SECTION I: PUD-

PUD-803-3 Minor Amendment

STAFF RECOMMENDATION

<u>Amendment Request:</u> Modify the PUD Development Standards to increase concrete coverage to 50%, referred to as Maximum Front Yard Coverage by Parking Area.

Currently, the development standards limit the Maximum Front Yard Coverage by Parking Area to 40%. The increase is being requested due to the unusual shape of the subject lots.

<u>Staff Comment:</u> This request can be considered a Minor Amendment as outlined by Section 30.010.I.2.c(9) of the City of Tulsa Zoning Code.

"Changes in structure heights, building setbacks, yards, open spaces, building coverage and lot widths or frontages, provided the approved PUD development plan, the approved standards and the character of the development are not substantially altered."

Staff has reviewed the request and determined:

- 1) The requested amendment does not represent a significant departure from the approved development standards in the PUD.
- 2) All remaining development standards defined in PUD-803 and subsequent amendments shall remain in effect.

Exhibits included with staff recommendation:

INCOG zoning case map INCOG aerial photo

With considerations listed above, staff recommends **approval** of the minor amendment request to increase the Maximum Front Yard Coverage by Parking Area to 50%.

and North Trenton Avenue

The Lot-Split proposal is to split an existing Agriculture-Residential (AG-R) tract into four tracts. All tracts will meet the Bulk and Area requirements of the Tulsa County Zoning Code.

The Technical Advisory Committee met on December 7, 2017 and had the following comment. The County Engineer is requesting that 30' of right-of-way be dedicated along North Trenton Avenue, including any previously dedicated right-of-way. Washington County Rural water district # 3 stated that water service is available for Tract 1, Tract 2, and Tract 3. At such time as water service is requested for Tract 4, all requirements of the district must be met.

The proposed lot-split would not have an adverse affect on the surrounding properties and staff recommends **APPROVAL** of the lot-split and the waiver of the Subdivision Regulations that no lot have more than three side lot lines.

Location: South of the southeast corner of West 41st Street South and

South 61st West Avenue

The Lot-Split proposal is to split an existing Residential Single-Family (RS) tract into two tracts. On December 19, 2017 Tulsa County Board of Adjustment approved a variance of the minimum frontage requirement on a public street/dedicated right-of-way from 30 ft. to 0 ft. The County Board approved the variance with the condition that the applicant submits a survey showing a mutual access easement from the applicant's property to a public street. Therefore, both tracts will meet the Bulk and Area requirements of the Tulsa County Zoning Code.

The Technical Advisory Committee met on December 7, 2017 and had the following comment. Development Services has stated that Tract 2 would require a waterline easement and extension at the time service is requested.

The proposed lot-split would not have an adverse affect on the surrounding properties and staff recommends **APPROVAL** of the lot-split and the waiver of the Subdivision Regulations that no lot have more than three side lot lines.

SECTION I: Z-7430

DEVELOPMENT CONCEPT:

This request for rezoning is responsive to the City Council initiative that encourages mixed-use development near the anticipated enhanced stations along the proposed bus rapid transit system route. The current zoning on the site is Office-medium intensity (OM) which allows unlimited height and building coverage. OM zoning allows office uses, apartments, hospitals, library's, financial institutions single household and many other uses that are consistent with the MX2 zoning classification.

MX2 zoning generally allows similar uses as OM zoning however the lot and building regulations require additional detail for transparency requirements, build to zone standards and other desirable standards for development in this area.

DETAILED STAFF RECOMMENDATION:

Case Z-7430 request MX2-V-U is consistent with the expected development pattern in the area and,

MX2-V-U is not injurious to the surrounding property owners and,

The MX2 requested is considered a community mixed use to accommodate retail, service, entertainment and employment uses that may serve the surrounding neighborhood. MX2 is also intended to accommodate larger scale development and supports the anticipated uses in this area location along South Peoria. The rezoning request is consistent with the Bus Rapid Transit System study and its land use recommendations and,

MX2-V-U is consistent with the Town Center land use vision in the Tulsa Comprehensive Plan therefore,

Staff recommends Approval of Z-7430 to rezone property from OM to MX2-V-U.

SECTION II: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary: MX2-V-U is consistent with the Tulsa Comprehensive Plan.

Land Use Vision:

Land Use Plan map designation: Town Center

Town Centers are medium-scale, one to five story mixed-use areas intended to serve a larger area of neighborhoods than Neighborhood Centers, with retail, dining, and services and

employment. They can include apartments, condominiums, and townhouses with small lot single family homes at the edges. A Town Center also may contain offices that employ nearby residents. Town centers also serve as the main transit hub for surrounding neighborhoods, and can include plazas and squares for markets and events. These are pedestrian-oriented centers designed so visitors can park once and walk to number of destinations.

Areas of Stability and Growth designation: Area of Growth

The purpose of Areas of Growth is to direct the allocation of resources and channel growth to where it will be beneficial and can best improve access to jobs, housing, and services with fewer and shorter auto trips. Areas of Growth are parts of the city where general agreement exists that development or redevelopment is beneficial. As steps are taken to plan for, and, in some cases, develop or redevelop these areas, ensuring that existing residents will not be displaced is a high priority. A major goal is to increase economic activity in the area to benefit existing residents and businesses, and where necessary, provide the stimulus to redevelop.

Areas of Growth are found throughout Tulsa. These areas have many different characteristics but some of the more common traits are close proximity to or abutting an arterial street, major employment and industrial areas, or areas of the city with an abundance of vacant land. Also, several of the Areas of Growth are in or near downtown. Areas of Growth provide Tulsa with the opportunity to focus growth in a way that benefits the City as a whole. Development in these areas will provide housing choice and excellent access to efficient forms of transportation including walking, biking, transit, and the automobile."

<u>Transportation Vision:</u> None that would affect site redevelopment. River parks and the associated trail is approximately 750 feet from the west boundary.

Major Street and Highway Plan:

Trail System Master Plan Considerations: The only public access to the trail from this site is from East 71st Street South. The south end of Quincy is currently constructed as a dead end street with no access to Riverside Drive or to the park and trail system. Staff suggest a street and trail connection to this site from the south end of Quincy.

Small Area Plan: None

<u>Special District Considerations:</u> None however it should be noted that the river corridor overlay east boundary is Quincy.

Historic Preservation Overlay: None

DESCRIPTION OF EXISTING CONDITIONS:

<u>Staff Summary:</u> The site is generally flat with no known conditions that would affect site development.

Environmental Considerations: None that would affect site development

SECTION I: CZ-466

DEVELOPMENT CONCEPT: Rezone from CS to IL in order to permit the development of the property for a light industrial use. The applicant intends to utilize the site for metalwork and welding (Use Unit 25). Industrial uses have a required setback of 75 feet from R and AG zoned lots. In addition, Use Unit 25 uses are required to be located within enclosed buildings, if within 300 feet of an R district. They are also required to install a screening wall or fence along the lot lines in common with an R district. Any accessory storage of materials and equipment is also required to be screened from R districts with a screening wall of fence.

DETAILED STAFF RECOMMENDATION:

IL zoning would not be appropriate if the setback and screening provisions were not required, but, given the context of the subject lot and those requirements, IL zoning would be non-injurious to the existing proximate properties and;

CZ-466 is consistent with the anticipated future development pattern of the surrounding property therefore:

Staff recommends Approval of CZ-466 to rezone property from CS to IL.
