Dear Dwayne: Attached is a copy of the Application for Zoning Clearance Permit I filed on January 14, 2019. While we are waiting for a response to the Application for the City, I respectfully request that the hearing on the Zoning Application be continued to February 20, 2019. Let me know if you have any questions. Best regards, Lou Reynolds

Mike,

That's correct. The new development plan will be treated like a zoning application and will be adopted by ordinance if approved. You will be required to pay fees for notices as well.

Let me know if you've got other questions on this!

Nathan,
I'm assuming the fee for this will be the $1,500 even though the zoning action was done in the past? I will be doing the Development Plan portion only so wasn't sure how the fees would work.

Regards,

Mike Thedford
Land Development Planner
Thanks Mike.

Thanks for your time this morning. In response to our meeting and the significance of the changes requested we cannot complete our staff report for a timely distribution to the Planning Commission prior to the February 6th meeting.

Staff request a continuance to the February 20th planning commission for CO-8.

With this email staff also request a continuance to the February 20th Planning Commission for the Earnest Childers VA clinic preliminary plat and the associated request to allow a release for an accelerated building permit.

Please let me know if you would like to discuss further.

Respectfully,

Dwayne

Dwayne,
Per your request, see attached.

It's important to note that this afternoon, we were instructed to delete "Lot 2" (Morning Crest) from this plat. Essentially, this will be a Block 1, Lot 1 plat. The sanitary sewer easement that is showing on the Morning Crest piece will shift to the east and be dedicated by separate instrument. This will require a slight revision to the Development Standards to eliminate any reference to Development Area B.

Please let me know any concerns or questions you may have with this late development.

**EXHIBITS:** Site Map, Aerial, Preliminary Plat, Applicant’s Request
MODIFICATION OF THE SUBDIVISION AND DEVELOPMENT
REGULATIONS

MR-2 – The Summit at Tulsa Hills - (CD 2)
South of the southeast corner of West 71st Street South and South Union Avenue

The applicant has requested that the Planning Commission remove the requirement that the property owner construct a sidewalk as part of the construction of a new single-family subdivision. The Subdivision and Development Regulations require sidewalks to be constructed on all arterial streets adjacent to new subdivisions.

The proposed subdivision includes 59 new single-family residential lots. The property is situated between an existing apartment complex and commercial uses to the south and undeveloped property to the north. If the property to the north were rezoned and developed, platting requirements would be incurred and sidewalks would be required to be installed that would connect the subject property to West 71st Street. There are existing sidewalks and a Tulsa Transit stop on West 71st Street that should be connected to new developments occurring along South Union Avenue via a sidewalk.

Sidewalks were required for the multifamily project south of the site; however, they were not installed. The requirement for sidewalks remains and could cause future permitting issues for the property owners.

There are currently no plans for widening of South Union Avenue. The City of Tulsa does not have funding in place nor do they have any imminent plans to alter the configuration of the street.

Staff recommends denial of the modification of the Subdivision and Development Regulations to remove the requirement for sidewalk construction along South Union Avenue adjacent to the proposed “The Summit at Tulsa Hills” subdivision plat finding that it does not align with the Tulsa Comprehensive Plan or meet the modification requirements of the Subdivision and Development Regulations.

Re: Request for Modification of Subdivision Regulations for The Summit at Tulsa Hills

Dear Nathan:

This letter serves as a request for a modification of the Tulsa Subdivision and Development Regulations (the “Regulations”) to waive the requirement for sidewalk installation (Section 5-070) along South Union Avenue at The Summit at Tulsa Hills (the “Project”). The preliminary plat for the Project was approved by TMAPC on September 5, 2018, a copy of which is attached hereto as Exhibit “A”.

The reason for the requested waiver is due to the topography and existing bar ditch that runs along Union Ave., making the installation of a sidewalk impractical. In fact, there have not been any sidewalks installed for any of the developments along Union Ave. between 71st Street and 81st Street.

Nathalia M. Cornett
Strict compliance with the sidewalk requirement would cause undue hardship to the property owner based on the existence of a bar ditch running the length of South Union Avenue. In accordance with Section 10-070.4 of the Regulations, the requested waiver will not be detrimental to the public safety, health or welfare; nor will it be injurious to other property or improvements; nor will it impair the spirit and intent of the Tulsa Zoning Code or Comprehensive Plan.

Enclosed with this letter is a check for the requisite filing fee. Should you need any additional information to process this request, please do not hesitate to call me at (918) 747-8900.

Sincerely,

ELLER & DETRICH
A Professional Corporation

Nathalie M. Cornett

**EXHIBITS:** Case Map, Aerial, Site Plan, Applicant's Request
MODIFICATION OF THE SUBDIVISION AND DEVELOPMENT REGULATIONS

MR-3 – 3818 S. St. Louis Ave - (CD 9)
South of the southwest corner of East 38th Street South and South St. Louis Avenue - Lot 3, Block 4 – Forest Ridge Addition

The applicant has requested that the Planning Commission remove the requirement that the property owner construct a sidewalk as part of the construction of a new home. The newly adopted Subdivision and Development Regulations require sidewalks to be constructed on any new development requiring both new construction building permits and a certificate of occupancy.

The property under application is located within a neighborhood where there are currently no sidewalks. The newly constructed home would be the only property in the immediate area with a sidewalk and the sidewalk would not provide the connectivity that is the intended goal of the Subdivision and Development Regulations.

It is anticipated that the City of Tulsa will begin collecting fees-in-lieu for sidewalks in the near future to address situations where the immediate installation of sidewalks is not practical. Currently, the program for collection and allocation of those fees has not been implemented and a modification approval by TMAPC is the only relief from the sidewalk requirement.

Staff recommends approval of the modification of the Subdivision and Development Regulations to remove the requirement for sidewalk construction on this property.

Re: 3818 South St. Louis, Ave. Tulsa, Oklahoma 741105 (“Property”)  
Request for Modification of Sidewalk Requirement

Gentlemen:

Terrazzo Properties, LLC is constructing a single family residence on the Property. We are requesting a modification of the sidewalk requirement contained in Paragraph 5-070 of the Tulsa Metropolitan Area Subdivision and Development that provides that no certificate of occupancy shall be issued until a sidewalk is constructed. We are requesting that no sidewalk be required for a certificate of occupancy to be issued for the Property.

The Property is located in midtown Tulsa in Forest Ridge Addition, an old, well established subdivision in which no sidewalks exist. To require a sidewalk for the Property would offer no utility to the area and would not be consistent with the current aesthetics of the area. These factors make the sidewalk installation impractical.

The granting of this modification will not be detrimental to the public safety, health or welfare, will not be injurious to other property or improvement, or impair the spirit, purposes or intent of applicable subdivision regulations or comprehensive plan policies.

Sincerely yours,

TERRAZZO PROPERTIES LLC

MIKE ALEXANDER

MODIFICATION OF THE SUBDIVISION AND DEVELOPMENT REGULATIONS

MR-4 – 3123 E. 26th Pl. - (CD 4)
East of the northeast corner of East 26th Place South and South Florence Avenue – Lot 18, Block 3 – Sheila Terrace

The applicant has requested that the Planning Commission remove the requirement that the property owner construct a sidewalk as part of the construction of a new home. The newly adopted Subdivision and Development Regulations require sidewalks to be constructed on any new development requiring both new construction building permits and a certificate of occupancy.

The property under application is located within a neighborhood where there are currently no sidewalks. In addition, there are existing mature trees that would be required to be removed in order to construct a sidewalk. The newly constructed home would be the only property in the immediate area with a sidewalk and the sidewalk would not provide the connectivity that is the intended goal of the Subdivision and Development Regulations.

It is anticipated that the City of Tulsa will begin collecting fees-in-lieu for sidewalks in the near future to address situations where the immediate installation of sidewalks is not practical. Currently, the program for collection and allocation of those fees has not been implemented and a modification approval by TMAPC is the only relief from the sidewalk requirement.

Staff recommends approval of the modification of the Subdivision and Development Regulations to remove the requirement for sidewalk construction on this property.

Re: 3123 East 26th Place, Tulsa, Oklahoma 74114 “Property”
Request for Modification of Sidewalk Requirement

Gentlemen:

Insight Homes, Inc is constructing a single family residence on the Property. We are requesting a modification of the sidewalk requirement contained in Paragraph 5-070 of the Tulsa Metropolitan Area Subdivision and Development that provides that no certificate of occupancy shall be issued until a sidewalk is constructed. We are requesting that no sidewalk be required for a certificate of occupancy to be issued for the Property.

The Property is located in midtown Tulsa in Sheila Terrance, an old, well established subdivision in which no sidewalks exist. To require a sidewalk for the Property would offer no utility to the area and would not be consistent with the current aesthetics of the area. These factors make the sidewalk installation impractical.

The granting of this modification will not be detrimental to the public safety, health or welfare, will not be injurious to other property or improvement, or impair the spirit, purposes or intent of applicable subdivision regulations or comprehensive plan policies.

Sincerely yours,

INSIGHT HOMES, INC.

MIKE ALEXANDER

REVISED 1/30/2019
SECTION I: Z-7468

DEVELOPMENT CONCEPT:
Applicant has also noted his plan to combine all 5 lots into a single parcel. The parcels can be combined with or without the rezoning approval.

EXHIBITS:
INCOG Case map
INCOG Aerial (small scale)
INCOG Aerial (large scale)
Tulsa Comprehensive Plan Land Use Map
Tulsa Comprehensive Plan Areas of Stability and Growth Map
Applicant Exhibits:
Exhibit illustrating IL zoning request and lot combinations

DETAILED STAFF RECOMMENDATION:
IL zoning as requested in Z-7468 is not consistent with the Main Street Land Use designation in the comprehensive plan and,

Uses that may be allowed in an IL district are not consistent with the Sequoyah implementation plan and,

IL zoning allows uses that may be considered injurious to the proximate properties and,

IL zoning allows uses that are not consistent with the expected development of the surrounding properties therefore,

Staff recommends denial of Z-7468 to rezone property from CH to IL.

SECTION II: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary: Main street land use vision does not include light industrial uses.

Land Use Vision:

Land Use Plan map designation: Main Street

Main Streets are Tulsa’s classic linear centers. They are comprised of residential, commercial, and entertainment uses along a transit-rich street usually two to four lanes wide and includes much lower intensity residential neighborhoods situated behind. Main Streets are pedestrian-oriented places with generous sidewalks, storefronts on the ground floor of buildings, and street trees and other amenities. Visitors from outside the surrounding neighborhoods can travel to Main Streets by bike, transit, or car. Parking is provided on street, small private off street lots, or in shared lots or structures.

Areas of Stability and Growth designation: Area of Growth

The purpose of Areas of Growth is to direct the allocation of resources and channel growth to where it will be beneficial and can best improve access to jobs, housing, and services with fewer and shorter
auto trips. Areas of Growth are parts of the city where general agreement exists that development or redevelopment is beneficial. As steps are taken to plan for, and, in some cases, develop or redevelop these areas, ensuring that existing residents will not be displaced is a high priority. A major goal is to increase economic activity in the area to benefit existing residents and businesses, and where necessary, provide the stimulus to redevelop.

Areas of Growth are found throughout Tulsa. These areas have many different characteristics but some of the more common traits are close proximity to or abutting an arterial street, major employment and industrial areas, or areas of the city with an abundance of vacant land. Also, several of the Areas of Growth are in or near downtown. Areas of Growth provide Tulsa with the opportunity to focus growth in a way that benefits the City as a whole. Development in these areas will provide housing choice and excellent access to efficient forms of transportation including walking, biking, transit, and the automobile."

**Transportation Vision:**

**Major Street and Highway Plan:** None except the secondary arterial designation

**Trail System Master Plan Considerations:** None

**Small Area Plan:** Sequoyah Area Neighborhood Implementation Plan (Effective may 2007)

This location is considered a major activity center:

Major Activity Centers include Admiral Place corridor, Salvation Army Boys and Girls Club, and neighborhood churches. Such centers are generally thought of as urban areas that include concentrations of business, commercial and other uses which draw a large number of people from the region on a daily basis.

Most of the recommendations outlined in the implementation plan are public improvement strategies to help encourage redevelopment

This implementation plan was completed prior to the current City of Tulsa Comprehensive Plan and does not align itself with the current land use designations for the area.

**Special District Considerations:** None except recommended public improvements outlined in the Sequoyah Neighborhood Implementation Plan.

**Historic Preservation Overlay:** None

**DESCRIPTION OF EXISTING CONDITIONS:**

**Staff Summary:** The existing site is a mix of several small buildings historically used as an auto repair shop with gravel parking areas.

**Snippet from northeast looking south west toward site.**
Environmental Considerations: None that would affect site redevelopment

**County Commission District:** 2

Commissioner Name: Karen Keith
SECTION I: Z-7469

DEVELOPMENT CONCEPT: This request for rezoning is responsive to a City Council initiative to encourage mixed use development along the proposed bus rapid transit system route. The site is currently zoned OM and does not have a building height restriction. The Mixed-Use rezoning request is also for unlimited height.

The City initiated a land use study that resulted in zoning recommendations on property within ½ a mile of proposed enhanced stations along the bus rapid transit route. The subject property was included in that recommendation and the owner of that property has opted-in to a voluntary rezoning program initiated by the Tulsa City Council. No immediate development of the property is proposed.

EXHIBITS:
- INCOG Case map
- INCOG Aerial (small scale)
- INCOG Aerial (large scale)
- Tulsa Comprehensive Plan Land Use Map
- Tulsa Comprehensive Plan Areas of Stability and Growth Map
- Applicant Exhibits:
  - Client Concept Statement

DETAILED STAFF RECOMMENDATION:

Case Z-7469 request MX1-U-U is consistent with the expected development pattern in the area and,

MX1-U-U is not injurious to the surrounding property owners and and,

The bus rapid transit study recommended MX1-U without a height recommendation on this site. The rezoning request is consistent with the Bus Rapid Transit System study and its land use recommendations and,

MX1-U-U is consistent with the Mixed-Use Corridor land use vision in the Tulsa Comprehensive Plan therefore,

Staff recommends APPROVAL of Z-7469 to rezone property from RS-3/ to MX1-U-U.

SECTION II: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary: MX1-U-U is consistent with the land use vision in the Tulsa Comprehensive Plan and is also consistent with the goals, objectives and strategies of the Riverwood Neighborhood Small Area Plan.

Land Use Vision:

Land Use Plan map designation: Mixed-Use Corridor

A Mixed-Use Corridor is a plan category used in areas surrounding Tulsa's modern thoroughfares that pair high capacity transportation facilities with housing, commercial, and employment uses. The streets usually have four or more travel lanes, and sometimes additional lanes dedicated for transit and bicycle use. The pedestrian realm includes sidewalks separated...
from traffic by street trees, medians, and parallel parking strips. Pedestrian crossings are designed so they are highly visible and make use of the shortest path across a street. Buildings along Mixed-Use Corridors include windows and storefronts along the sidewalk, with automobile parking generally located on the side or behind. Off the main travel route, land uses include multifamily housing, small lot, and townhouse developments, which step down intensities to integrate with single family neighborhoods.

Areas of Stability and Growth designation: Area of Growth
The purpose of Areas of Growth is to direct the allocation of resources and channel growth to where it will be beneficial and can best improve access to jobs, housing, and services with fewer and shorter auto trips. Areas of Growth are parts of the city where general agreement exists that development or redevelopment is beneficial. As steps are taken to plan for, and, in some cases, develop or redevelop these areas, ensuring that existing residents will not be displaced is a high priority. A major goal is to increase economic activity in the area to benefit existing residents and businesses, and where necessary, provide the stimulus to redevelop.

Areas of Growth are found throughout Tulsa. These areas have many different characteristics but some of the more common traits are close proximity to or abutting an arterial street, major employment and industrial areas, or areas of the city with an abundance of vacant land. Also, several of the Areas of Growth are in or near downtown. Areas of Growth provide Tulsa with the opportunity to focus growth in a way that benefits the City as a whole. Development in these areas will provide housing choice and excellent access to efficient forms of transportation including walking, biking, transit, and the automobile."

Transportation Vision:

Major Street and Highway Plan: No designation

Trail System Master Plan Considerations: 
None that affect site development however the river trail system is less than ½ mile from this site. Pedestrian and bicycle connectivity should be an important concept with any new redevelopment opportunity.

Small Area Plan:

Riverwood Neighborhood Small Area Plan (Completed in 2008).

Phase One infrastructure recommendations included Transit Connections and shelters specifically for Inhofe Plaza which is west of this site across Peoria.

The Riverwood Community identified the viability of retail and land uses along South Peoria corridor as a key element of the community plan. These activities contribute to greater livability and convenience within the neighborhood and can convey a neighborhood identity to visitors as well as residents from other areas of the City. Rezoning considerations should consider a walkability community especially for frequent users that may be elderly or physically challenged.

The primary goal identified in this small area plan:

Provide diversified, convenient, concentrated, and efficient commercial activities. This will add to the quality of area as a self-sufficient unit of the total urban pattern.

REVISED 1/30/2019
Objectives include:
1. Locate commercial facilities where compatible commercial uses can support one another and where community services and facilities are capable of supporting commercial activities.
2. Provide a reasonable ratio of commercial activities in relation to the population residing within the area.

Strategies for redevelopment included in the small area plan include:
1. Add continuous sidewalks on both sides of the street
2. Redesign the fronts of large parking lots and build small closely spaced or attached storefronts with courtyard parking behind
3. Encourage a mix of housing within walking distance of commercial areas
4. Encourage site store entrances near street fronts and parking lots to the rear of buildings so transit riders and cyclist have easy access to the store areas.

Special District Considerations: None

Historic Preservation Overlay: None

DESCRIPTION OF EXISTING CONDITIONS:

Staff Summary: Empty Lot is available for density recommended in the Bus Rapid Transit Study area.

Environmental Considerations: None that would affect site development

SECTION III: Relevant Zoning History
ZONING ORDINANCE: Ordinance number 11823 dated June 26, 1970, established zoning for the subject property.

Subject Property: No relevant history

Surrounding Property:

Z-7464 December 2018: All concurred in approval of a request for rezoning a .52+ acre tract of land from OM to MX1-U-U on property located north of the northeast corner of East 60th Street South Peoria Avenue. This request for rezoning was responsive to a City Council initiative to encourage mixed use development along the proposed bus rapid transit system route.

BOA-21181 July 2011: The Board of Adjustment approved a special exception to permit a multi-family residence in an OL zoning district (Section 601), on property located at 1313 East 60th Street.

BOA-19099 September 2001: The Board of Adjustment approved a special exception to permit vehicle repair in a CS district, noting this is only for the rear building and with condition of no outside storage or display of merchandise for sale, and no inoperable vehicles be permitted on the premises in excess of 48 hours, on property located north of the northwest corner of East 60th Street South and South Peoria Avenue.

BOA-18815 July 2000: The Board of Adjustment approved a special exception to permit auto sales in a CS district and vehicle repair in preparation for sale, on the condition specifically that no body work, auto painting, or major engine work be allowed, and that vehicles offered for sale would have to be on a paved parking area; and denied a special exception to permit storage or display of motorized vehicles on gravel located behind the building setback line, on property located north of the northeast corner of East 60th Street South and South Peoria Avenue.

PUD-472/Z6326 July 1991: All concurred in approval of a proposed Planned Unit Development and an approval of a request for rezoning on a 1.08+ acre tract of land from OL to CS for a mini-storage on property located east of the southeast corner of East 58th Street South and South Peoria Avenue.

Z-5980 October 1984: All concurred in approval of a request for rezoning a tract of land from OM to CS on property located north of the northeast corner of East 60th Street South Peoria Avenue.

Z-5593 September 1981: All concurred in approval of a request for rezoning a tract of land from CS and RS-3 to OM on property located on the northeast corner of East 60th Street South and South Peoria Avenue.

Z-5354 March 1980: All concurred in approval of a request for rezoning a tract of land from RS-3 to OL on property located east of the northeast corner of East 60th Street South and South Peoria Avenue.

Z-5593 September 1981: All concurred in approval of a request for rezoning a tract of land from CS and RS-3 to OM on property located on the northeast corner of East 60th Street South and South Peoria Avenue.

From: Owners of the Property  
Application for rezoning  
Property address: 1327 E. 60th St  
Desired zoning: MX

As a proud Tulsa resident for 22 years, we are glad to see the steady growth and beautification of our city. With having several close friends along the Peoria/Riverside avenue between 61st and 30th and roaming the area for many years for work and pleasure, this mature and unique area in Tulsa has always left me with good memories and good interest in mind. Eventually we purchased a condo in the beautiful Swiss Riviera Condos. Through the years driving the area, fell in love with a few properties on 60th street and acquired them recently. We would like to see the area grow, beautifies, prosper and benefit the neighborhood and Tulsa. Being close to the Arkansas River, Tulsa Golf Club, Gathering Place and many development on the south and north we would like to see this area to grow with modern urban living standards. We have several plans for our lots, this one in particular. Below are few plans and flexible to adjust details as the Peoria area development begins to shape.

Plan Number One:  
Ten to twelve single family, two story units, consists of figures 1 and 2. 
About 1300SF OR 1700SF with 1 Car Parking and common Scooter or Bike Racks
Plan Number Two:
Ten to twelve single family, two story units, consists of figures 3.
About 1700SF to 2000SF with 2 Car Garage
Plan Number Three:
Town homes with car garage and common play and garden area. Similar to figure 4.

Figure 4.

Goal and Concept for development of lot Eleven (11), LESS the East Two (2) feet thereof, Southlawn Addition.
To build 10 to 12 independent or townhouse, one or two story, three bedroom, very modern mid-upper scale houses in two rows in the lot. Low energy consumption and harmony with environment will be considered in the design of the houses and development of the lot. The existing old trees will be saved as much as possible and will become part of landscaping of the lot. The homes will be marketed toward younger Tulsans professionals or whom who like to make Tulsa their new homes.

A. Background

The land use assigned for this area at the time of adoption of the 2010 Tulsa Comprehensive plan was New Neighborhood, with a Stability and Growth Map designation of Area of Growth. The site that is subject to this Comprehensive Plan amendment application is in South Tulsa. The subject property is surrounded by Residential Single-family zoning and with a mix of existing residential subdivisions and subdivisions currently under development. The property has frontage on South Sheridan Road which serves as the corporate limits boundary between the City of Tulsa and the City of Bixby.

The applicant has submitted a corresponding rezoning application (Z-7470) for the subject site. The applicant has requested to rezone from RS-3 to CS with an optional development plan. The parcel is included in the Addison Creek Subdivision that was filed 12/31/2018. The subject property is identified as a reserve area in the plat and designated by the owner for the “Addison Market, an innovative, neighborhood-oriented general store with spaces for small shops like and ice cream store, fresh produce sales, offices and neighborhood-oriented services.”
B. Existing Land Use and Growth Designations (Tulsa Comprehensive Plan)

When the Tulsa Comprehensive Plan was developed and adopted in 2010 the subject tract was designated as an *Area of Growth*:

"The purpose of Areas of Growth is to direct the allocation of resources and channel growth to where it will be beneficial and can best improve access to jobs, housing, and services with fewer and shorter auto trips. Areas of Growth are parts of the city where general agreement exists that development or redevelopment is beneficial. As steps are taken to plan for, and, in some cases, develop or redevelop these areas, ensuring that existing residents will not be displaced is a high priority. A major goal is to increase economic activity in the area to benefit existing residents and businesses, and where necessary, provide the stimulus to redevelop.

Areas of Growth are found throughout Tulsa. These areas have many different characteristics but some of the more common traits are close proximity to or abutting an arterial street, major employment and industrial areas, or areas of the city with an abundance of vacant land. Also, several of the Areas of Growth are in or near downtown. Areas of Growth provide Tulsa with the opportunity to focus growth in a way that benefits the City as a whole. Development in these areas will provide housing choice and excellent access to efficient forms of transportation including walking, biking, transit, and the automobile."

A *New Neighborhood* land use designation was assigned for the area subject at the time of the adoption of the Tulsa Comprehensive Plan in 2010:

"The New Neighborhood category is intended for new communities developed on vacant land. These neighborhoods are comprised primarily of single-family homes on a range of lot sizes but can include townhouses and low-rise apartments or condominiums. These areas should be designed to meet high standards of internal and external connectivity and shall be paired with an existing or new Neighborhood or Town Center."

C. Proposed Land Use Designations (Tulsa Comprehensive Plan)

The applicant is proposing a *Neighborhood Center* land use designation and to maintain the *Area of Growth* designation on the subject site.

"Neighborhood Centers are small-scale, one to three story mixed-use areas intended to serve nearby neighborhoods with retail, dining, and services. They can
include apartments, condominiums, and townhouses, with small lot single family homes at the edges. These are pedestrian-oriented places served by transit, and visitors who drive can park once and walk to number of destinations.”

D. Zoning and Surrounding Uses:

</tbody>
</table>

E. Applicant’s Justification:

As part of the amendment application, the applicant is asked to justify their amendment request. Specifically, they are asked to provide a written justification to address:

1. How conditions on the subject site have changed, as well as those on adjacent properties and immediate area;
2. How changes have impacted the subject site to warrant the proposed amendment; and;
3. How the proposed change will enhance the surrounding area and the City of Tulsa.

The applicant provided the following justification as part of their application:

1. Since PlaniTulsa plan was adopted in 2010, over 250 acres of development has either been constructed or is in the development stages located in both Tulsa and Bixby South of 121st Street South along the South Sheridan Corridor. The need for restricted services associated with single-family use has increased.
2. In order to capitalize on walking trails and the requirement for internal connection of neighborhoods, reasons to walk must be established which both meet the need for...
local conveniences and recreation. Walking for the sake of walking is not enough incentive to get residents out of the houses. By establishing points of interest and destinations along pedestrian trails, residents will be encouraged to lessen demand on driving.

3. The change in the Comprehensive Plan will allow rezoning (and Optional Development Plan) for the creation of a local destination and point of interest. Residents will have the opportunity to participate in increased recreational opportunities and take advantage of highly restricted conveniences services.

F. Staff Summary:

The applicant is proposing a Neighborhood Center Land Use designation and to maintain the Area of Growth designation on the site. The proposed land use designation will be the first introduction of the Neighborhood Center Designation into the Area and because of that staff has recommended the introduction of a development plan with the associated rezoning. The applicant is proposing Commercial-Shopping (CS) Zoning with an optional development plan that will restrict high intensity uses and allow for uses to primarily serve surrounding neighborhoods. In conjunction with the rezoning staff feels like the proposed Land Use designation will serve as accessory to the existing residential subdivision and encourage a more walkable and dynamic neighborhood that is consistent with the primary goals of the Tulsa Comprehensive Plan.

One of the findings in the comprehensive plan is continued support for both the development of single family neighborhoods and support for neighborhood grocery stores, parks, schools, and other amenities within a short drive, walk, or bike ride from home. The comprehensive plan describes neighborhoods that blend these amenities as complete neighborhoods. The current conditions of the surrounding area are previously undeveloped property that are quickly transitioning into single family residential subdivisions.

II. STAFF RECOMMENDATION

Staff recommends approval of the Neighborhood Center land use designations as submitted by the applicant.

SECTION I:  Z-7470

APPLICANTS DEVELOPMENT CONCEPT: The Addison Creek Market is intended to provide a neighborhood commercial and recreational amenity for residents for both Tulsa and Bixby. The market will act as a neighborhood meeting / gathering place and provide very limited neighborhood commercial services. The intent of The Market is not to provide a full commercial center but rather to create a community hub to recreate as a walk/bike assessible area where neighborhood residents can not only enjoy recreational activities but take advantage of very limited commercial services. The location of the Market is designed to provide both convenient pedestrian type access and buffer surrounding residential.

INCOG Aerial (large scale)
Tulsa Comprehensive Plan Land Use Map
Tulsa Comprehensive Plan Areas of Stability and Growth Map
Applicant Exhibits:

DETAILED STAFF RECOMMENDATION:

Z-7470 requesting CS zoning is not consistent with the new neighborhood land use designation. The concurrent request for a land use change to a Neighborhood Center would remove that conflict. CS zoning with an optional development plan (after approval of the land use plan) could help integrate a small neighborhood store or offices into this neighborhood and,

CS zoning with the optional development plan that limits uses and provides some design standards that are considered non-injurious to the surrounding property owners and,

CS zoning with the optional development plan is not consistent with the normal expected development pattern in the area and,

The large reserve area created for the surrounding subdivision provides a unique opportunity to integrate a neighborhood scale small development that could help add a unique character that is not found elsewhere in the Tulsa market therefore,

Staff recommends Approval of Z-7470 to rezone property from RS-3,RS-3,AG/ to CS but only with the optional development plan standards outlined in Section II and only if the comprehensive plan amendment is also approved.

SECTION II: OPTIONAL DEVELOPMENT PLAN STANDARDS:

Z-7470 with the optional development plan standards will conform to the provisions of the Tulsa Zoning Code for development in a CS zoning district and its supplemental regulations except as further refined below. All uses categories subcategories or specific uses outside the permitted uses defined below are prohibited.

Permitted Use Categories
A) Public, Civic and Institutional Use Category
   a. Parks and Recreation but limited to a privately owned and maintained park
B) Commercial Use Category:
a. Convenience Goods specific use but further limited so that no restaurant use containing a commercial kitchen shall be permitted. No fuel sales are allowed no alcohol is allowed.
b. Business or professional office. Medical, dental or health practitioner offices are prohibited
c. Assembly and Entertainment but limited to a food truck court. Food trucks shall not be powered by gas generators. Electrical connections will be provided for each food truck space.

C) Agricultural
a. Farm, Market or Community Supported garden.

Building Regulations
Maximum Floor area: 6,000 square feet
Maximum Building Height: 35 feet (measured from the finished floor elevation and includes any architectural element)

Hours of operation:
The building shall not be open before 6:30 am or later than 9:00pm except that special events may be allowed not more than 4 times per month and shall not extend past 11:00 pm.

Parking Regulations
Vehicular parking shall not be placed within 25 feet of any residential lot.
Parking shall conform to the parking standards outline in the Tulsa zoning code.

Signs:
Signage shall be limited to one ground monument style sign
Maximum display surface area shall not exceed 32 square feet.
Dynamic display is prohibited.
Ground signage may not be greater than 8 feet tall.

Lighting:
Lighting shall be designed and installed that is compatible with both the proposed use and surrounding uses. A photometric plan shall be submitted and approved to the TMAPC staff prior to with detailed site plan approval. In no case shall the light spillover exceed that as permitted in the Tulsa Zoning Code. No light fixture will be greater than 16 feet tall as measured from the light emitting element and the ground directly below the light.

SECTION III: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary: The proposed use is consistent with the proposed land use map change with the concurrent comprehensive plan amendment

Land Use Vision:

Current Land Use Plan map designation: New Neighborhood
The New Neighborhood category is intended for new communities developed on vacant land. These neighborhoods are comprised primarily of single-family homes on a range of lot sizes but can include townhouses and low-rise apartments or condominiums. These areas should be designed to meet high standards of internal and external connectivity and shall be paired with an existing or new Neighborhood or Town Center."
Proposed Land Use Plan map designation: Neighborhood Center (refer to CPA-79)
“Neighborhood Centers are small-scale, one to three story mixed-use areas intended to serve nearby neighborhoods with retail, dining, and services. They can include apartments, condominiums, and townhouses, with small lot single family homes at the edges. These are pedestrian-oriented places served by transit, and visitors who drive can park once and walk to number of destinations.”

Areas of Stability and Growth designation: Area of Growth
“The purpose of Areas of Growth is to direct the allocation of resources and channel growth to where it will be beneficial and can best improve access to jobs, housing, and services with fewer and shorter auto trips. Areas of Growth are parts of the city where general agreement exists that development or redevelopment is beneficial. As steps are taken to plan for, and, in some cases, develop or redevelop these areas, ensuring that existing residents will not be displaced is a high priority. A major goal is to increase economic activity in the area to benefit existing residents and businesses, and where necessary, provide the stimulus to redevelop. Areas of Growth are found throughout Tulsa. These areas have many different characteristics but some of the more common traits are close proximity to or abutting an arterial street, major employment and industrial areas, or areas of the city with an abundance of vacant land. Also, several of the Areas of Growth are in or near downtown. Areas of Growth provide Tulsa with the opportunity to focus growth in a way that benefits the City as a whole. Development in these areas will provide housing choice and excellent access to efficient forms of transportation including walking, biking, transit, and the automobile.”

Transportation Vision:

Major Street and Highway Plan: None

Trail System Master Plan Considerations: Connection to the trail system along the Arkansas River should be part of the pedestrian connectivity considerations.

Small Area Plan: None

Special District Considerations: None

Historic Preservation Overlay: None

DESCRIPTION OF EXISTING CONDITIONS: None

Staff Summary: The site is part of a reserve area for The Enclave at Addison Creek and is abutting South Sheridan avenue and a stormwater detention facility that will also be used as a recreational area for the subdivision. The surrounding property is all being developed and this would be integrated into the home owners association for management.

Environmental Considerations: None that affect site development

SECTION IV: Relevant Zoning History

ZONING ORDINANCE: Ordinance number 23086 dated April 16, 2014, established zoning for the subject property.

Subject Property:

Z-7257 April 2014: All concurred in approval of a request for rezoning an 80+ acre tract of land from AG to RS-3 for residential single-family development, on property located north of the northwest corner of E. 131st St. and S. Sheridan Rd. (Ordinance number 23086 dated April 16, 2014 amended Ordinance 11838 dated June 26, 1970)

BOA-12274 November 1982: The Board approved a special exception to allow a mobile home in an AG zoned district and a variance to allow two dwelling units on one lot of record located on an 80+ acre tract of land, on property located north of the northwest corner of East 131st Street South and South Sheridan

Surrounding Property:

Z-7337 May 2016: All concurred in approval of a request for rezoning a 33+ acre tract of land from AG to RS-3 for single-family residential development, on property located south of the southwest corner of East 121st Street South and South Sheridan Road.

PUD-828/Z-7295 March 2015: All concurred in approval of a proposed Planned Unit Development on a 30+ acre tract of land for single-family residential subdivision and approval of a request for rezoning from AG to RS-3 on property located south of the southwest corner of East 121st Street South and South Sheridan Road.
PUD-812 July 2014: All concurred in approval of a proposed Planned Unit Development on a 10+ acre tract of land for residential single-family development, on property located north of northwest corner of E. 131st St. and S. Sheridan Rd.

PUD-803/Z-7243 January 2014: All concurred in approval of a proposed Planned Unit Development on a 122+ acre tract of land for single-family residential development and approval of a request for rezoning from AG to RS-3, on property located west of the southwest corner of East 121st Street South and South Sheridan Road.

*Present Use:* Residential

*Proposed Use:* Single-family subdivision

*Concept summary:* Rezone from AG to RE/PUD-852 to permit a residential single-family subdivision.

*Tract Size:* 10 ± acres

*Location:* S. of the SW/c of E. 161st St. S. & S. Lewis Ave.

**Zoning:**
*Existing Zoning:* AG

*Proposed Zoning:* PUD-852, RE

**Comprehensive Plan:**
*Land Use Map:* N/A

*Stability and Growth Map:* N/A

**Staff Recommendation:**
Staff recommends approval.

**County Commission District:** 3
*Commissioner Name:* Ron Peters
SECTION I: PUD-852

DEVELOPMENT CONCEPT: Rezone from AG to RE/PUD-852 to permit a single-family subdivision, Vintage Estates. The development is intended to follow the recommendations of the RE district, with the exceptions noted in the proposed Development Standards of the PUD.

EXHIBITS:
INCOG Case map
INCOG Aerial
INCOG Aerial (enlarged)
Applicant Exhibits:
   Vintage Estates Concept and Exhibits

DETAILED STAFF RECOMMENDATION:

PUD-852 is non injurious to the existing proximate properties and;
PUD-852 is consistent with the anticipated future development pattern of the surrounding property;
PUD-852 is consistent with the PUD chapter of the Tulsa County Zoning Code, therefore;

Staff recommends Approval of case PUD-852 to rezone property from AG to RE/PUD-852.

DEVELOPMENT STANDARDS:

Permitted Uses: Uses permitted by right in the RE Zoning District.

Minimum Lot Size: 22,500 sq. ft./0.50 Acres

Minimum Average Lot Width: 120 feet

Minimum Building Setbacks:
- Front 35 feet
- Rear Yard 25 feet
- Side Yard 5 feet/10 feet
- Side Yard Abutting a Private Street 30 feet

Maximum Building Height:
Accessory Buildings 45 feet*

Other Bulk and Area Requirements as established in the RE Zoning District.

* Architectural decorative features such as chimneys and cupolas, may extend to a maximum height of 45 feet. However, no habitable portion of any dwelling may exceed the 35 foot height limitation.

OPEN SPACE: Open space will be provided in accordance with the Tulsa County Zoning Code.

LOT SPLITS AND LOT COMBINATIONS: Prior to the issuance of lot splits and lot combinations applicant shall provide written approval of the Architectural Committee. Lots may be split or combined
so that dwelling units may include multiple lots, or portions of lots, in order to allow a building to be built over lot lines, but does not allow for the building to encroach into a platted utility easement.

**HOMEOWNERS’ ASSOCIATION:** The VINTAGE ESTATES Homeowners’ Association, to be established, will have as its main objective, the maintenance of the private street system, landscaped entryways, and reserve/open space areas. Membership in the VINTAGE ESTATES Homeowners’ Association will be mandatory for all lot owners. Final documents for the Vintage Estates Homeowners’ Association will be included in the Deed of Dedication and Restrictive Covenants and will be on file in the Tulsa County Clerk’s office, along with the Final Plat, and will include the maintenance agreement and other specific rights and requirements for association members.

**SITE PLAN REVIEW:** For the purposes of site plan review, the final subdivision plat of Vintage Estates shall serve as the required detailed site plan.

**PLATTING REQUIREMENT:** No building permit will be issued until the PUD site has been included within a subdivision plat submitted to and approved by the Tulsa Metropolitan Area Planning Commission and the Tulsa County Commission, and duly filed of record. The required subdivision plat will include covenants of record implementing the development standards of the approved PUD and the Tulsa County shall be a beneficiary thereof.

**EXPECTED SCHEDULE OF DEVELOPMENT:** Development of the project is expected to commence after final approval of the PUD and platting of the property.

I. DEVELOPMENT CONCEPT

Vintage Estates is a proposed single-family detached residential development submitted as a Planned Unit Development (PUD) pursuant to the provisions of the Tulsa County zoning code. The site consists of 10.00 acres, located on the west side of South Lewis Avenue and south of East 161st Street South; there is approximately 660 linear feet of frontage on South Lewis Avenue.

The site is bounded on the north, west and south by undeveloped Agriculture (AG) zoned land. East, across South Lewis Avenue, is undeveloped Agriculture (AG) zoned land. The project site is currently zoned Agriculture (AG). Submitted concurrently with this PUD application is a zoning request to re-zone the entire tract to RE, Residential Single-Family Estate.

The site is characterized by significantly sloping terrain, with a prominent ridge line running from northwest to southeast. There are two main drainageways located in the northeastern and western portion of the site, generally draining from west to northeast and north to south, respectively. The soil types for the site are typical for the area with a significant portion of the site having "Eram-Coweta complex, 5-15% slopes" which generally has a depth to bedrock of 26"-30". The indigenous rock onsite will require some developmental considerations. The location has favorable accessibility, location, and visibility from the surrounding roadways, with the one point of access being off of South Lewis Avenue.

Vintage Estates will feature single-family detached homes with lot sizes averaging 1 acre in size (See Exhibit 'A' - Conceptual Site Plan). Due to the significant on-site slopes, one point of access through a landscaped and gated entry from South Lewis Avenue will be provided. The streets at Vintage Estates will be private. Stormwater detention will be handled on-site, in the northeast and southeast portions of the project site.

</tbody>
</table>

* Architectural decorative features such as chimneys and cupolas, may extend to a maximum height of 45 feet. However, no habitable portion of any dwelling may exceed the 35 foot height limitation.
IV. **LANDSCAPING AND OPEN SPACE**

Landscaping and open space will be provided in accordance with the Tulsa County Zoning Code.

V. **FENCING**

There shall be no fencing allowed beyond the building lines as shown on the plat without the written permission from the Architectural Committee.

VI. **LOT SPLITS AND LOT COMBINATIONS**

Lot splits and lot combinations may be permitted, with the written approval of the Architectural Committee, to allow for lots to be split or combined so that dwelling units may include multiple lots, or portions of lots, in order to allow a building to be built over lot lines, but does not allow for the building to encroach into a platted utility easement.

VII. **HOMEOWNERS’ ASSOCIATION**

The VINTAGE ESTATES Homeowners’ Association, to be established, will have as its main objective, the maintenance of the private street system, landscaped entryways, and reserve/open space areas. Membership in the VINTAGE ESTATES Homeowners’ Association will be mandatory for all lot owners.

Final documents for the Vintage Estates Homeowners' Association will be included in the Deed of Dedication and Restrictive Covenants and will be on file in the Tulsa County Clerk's office, along with the Final Plat, and will include the maintenance agreement and other specific rights and requirements for association members.

VIII. **SITE PLAN REVIEW**

For the purposes of site plan review, the final subdivision plat of Vintage Estates shall serve as the required detailed site plan.

IX. **PLATTING REQUIREMENT**

No building permit will be issued until the PUD site has been included within a subdivision plat submitted to and approved by the Tulsa Metropolitan Area Planning Commission and the Tulsa County Commission, and duly filed of record. The required subdivision plat will include covenants of record implementing the development standards of the approved PUD and the Tulsa County shall be a beneficiary thereof.

X. **EXPECTED SCHEDULE OF DEVELOPMENT**

Development of the project is expected to commence after final approval of the PUD and platting of the property.

**EXHIBITS**: Site Map, Aerial, Preliminary Plat, Conceptual Improvements
PRELIMINARY SUBDIVISION PLAT

**Vintage Estates** - (County)
South of the southwest corner of East 161st Street South and South Lewis Avenue

This plat consists of 7 lots, 1 block on 10.014 ± acres.

The Technical Advisory Committee (TAC) met on January 17, 2019 and provided the following conditions:

1. **Zoning:** The property is currently zoned AG with a proposal for rezoning to RE (Residential-Estate) with a Planned Unit Development (PUD-852) to permit the use of a private street in the subdivision. All lots conform to the zoning requirements of RE and the proposed PUD. The new zoning will be required to be in effect prior to approval of the final plat.

2. **Addressing:** Final plat addresses will be assigned by INCOG and will be required to be shown on the face of the final plat along with the required address caveat.

3. **Transportation & Traffic:** Dedication of ROW for South Lewis Avenue per the Major Street and Highway Plan is required. Private street construction is required to be approved by the Tulsa County Engineer and comply with all County Engineering standards. Label street with designated street name on final plat.

4. **Sewer:** Lots to be served by on-site sewage disposal (septic) and will require approval by Oklahoma Department of Environmental Quality.

5. **Water:** Water to be served by Creek County Rural Water District #2. Water line plans must be approved by RWD2 and a release letter will be required prior to approval of the final plat.

6. **Engineering Graphics:** Add required signature block to the face of the plat. Ensure legal description accuracy with face of the plat.

7. **Fire:** No comments from local fire service.

8. **Stormwater, Drainage, & Floodplain:** No comments. Drainage is required to comply with all County drainage standards and improvements must be approved prior to final plat approval.

9. **Utilities:** Telephone, Electric, Gas, Cable, Pipeline, Others: All utilities indicated to serve the site must provide a release prior to final plat approval. Provide a Certificate of Records Search from the Oklahoma Corporation Commission to verify no oil & gas activity on the site.

Staff recommends APPROVAL of the preliminary subdivision plat subject to the conditions provided by TAC and all other requirements of the Subdivision and Development Regulations.
Note: Graphic overlays may not precisely align with physical features on the ground.

Vintage Estates

A subdivision in the Tulsa County, being a part of the NE4 of the NE4 of Section 30, Township 17 North, Range 13 East, of the Indian Meridian, Tulsa County, State of Oklahoma.
Case Number: MPD-1

Hearing Date: February 6, 2019

Owner and Applicant Information:

Applicant: Katy O'Melia
Property Owner: Flat Top Developments, LLC

Location Map: (shown with City Council Districts)

Applicant Proposal:

Present Use: agricultural
Proposed Use: Residential with Neighborhood Commercial Town Center
Concept summary: Master Planned Development for private street mixed use community
Tract Size: 117.5 + acres
Location: Southwest corner of East 31st Street & South 177th East Avenue

Zoning:

Existing Zoning: AG
Proposed Zoning: Master Planned Development (MPD)

Comprehensive Plan:

Land Use Map: Neighborhood Center, New Neighborhood
Stability and Growth Map: Area of Growth

Staff Recommendation:

Staff recommends approval of CONCORD a Master Planned Development as submitted by the applicant and as noted in supplemental staff standards:

Staff Data:

TRS: 
CZM: 40, 50 Atlas:

City Council District: 6
Councilor Name: Connie Dodson
County Commission District: 1
Commissioner Name: Stan Sallee
SECTION I: MPD-1

DEVELOPMENT CONCEPT:

Concord is a master planned community that utilizes new urbanism design principals in order to create a walkable, environmentally sustainable and economically diverse community. The projected is proposed to be a mixed-use master planned community consisting of multiple housing types, recreational, civic and commercial uses with integrated open space and park development.

- Applicant Exhibits:
  - CONCORD Master Plan Development Standards

DETAILED STAFF RECOMMENDATION:

MPD-1 is consistent with the New Neighborhood and Neighborhood Center Land Use designation in the Comprehensive Plan and is compatible with the existing and expected development of surrounding areas and,

MPD-1 provides a unified treatment of the development possibilities of the project site and,

Permitted uses and building types identified in MPD-1 are consistent with the uses that may be permitted in a master plan development district as identified in the Tulsa Zoning Code and,

MPD-1 identifies development standards that are consistent with the mandatory development plan standards in the Tulsa Zoning Code and,

MPD-1 is consistent with the purpose of a Master Planned Development district identified in the Tulsa Zoning code therefore,

Staff recommends Approval of MPD-1 as submitted with supplimental staff standards.

MPD-1 DEVELOPMENT STANDARDS:

See attached MPD-1 as submitted by applicant.

Supplemental standards added by staff:

1) Prior to submittal of any building permit to the City of Tulsa the Concord Town Planner shall review and approve plans for submittal to the Building Permit office. An approval statement shall be added on all pages of the plan package and shall be signed by the town planner. The approval statement shall say that the plans conform to the provisions of the approved MPD-1 uses and design standards. Except for detached houses, bungalow court, cottage court, duplex townhouse or multi-unit house all site plans shall be submitted to the City of Tulsa Planning office at INCOG through the site plan and landscape plan approval process.
2) No building permit may be issued until a subdivision plat has been filed at Tulsa County Clerk's office. The subdivision plat shall be considered the site plan for any detached house, bungalow court, cottage court, duplex townhouse or multi-unit house.

3) Residential Street A, Residential Street B, Town Center Main Street and Main Street Boulevard and Residential boulevard as illustrated on the master thoroughfare plan will be publicly owned and maintained.

4) Private lanes and private lanes with fire access shall be owned and maintained by a Concord Home Owners Association.

SECTION II: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary: MPD-1 is consistent with the expected uses for a Neighborhood Center and New Neighborhood. The precise alignment of the regulating plan does not align itself with the geographic boundaries shown on the Comprehensive Plan Land use maps however flood plain management and open space was not considered during the land use designation map preparation. The development standards are consistent with the expected development and align themselves with the required flood plain management concepts expected in this area.

Land Use Vision:

Land Use Plan map designation: Neighborhood Center and New Neighborhood

New Neighborhood residential building block is comprised of a plan category by the same name. It is intended for new communities developed on vacant land. These neighborhoods are comprised primarily of single-family homes on a range of lot sizes but can include townhouses and low-rise apartments or condominiums. These areas should be designed to meet high standards of internal and external connectivity and shall be paired with an existing or New Neighborhood or Town Center.

Neighborhood Centers are small-scale, one to three story mixed-use areas intended to serve nearby neighborhoods with retail, dining, and services. They can include apartments, condominiums, and townhouses, with small lot single family homes at the edges. These are pedestrian-oriented places served by transit, and visitors who drive can park once and walk to number of destinations.

Areas of Stability and Growth designation: Area of Growth

The purpose of Areas of Growth is to direct the allocation of resources and channel growth to where it will be beneficial and can best improve access to jobs, housing, and services with fewer and shorter auto trips. Areas of Growth are parts of the city where general agreement exists that development or redevelopment is beneficial. As steps are taken to plan for, and, in some cases, develop or redevelop these areas, ensuring that existing residents will not be displaced is a high priority. A major goal is to increase economic activity in the area to benefit existing residents and businesses, and where necessary, provide the stimulus to redevelop.

Areas of Growth are found throughout Tulsa. These areas have many different characteristics but some of the more common traits are close proximity to or abutting an arterial street, major employment and industrial areas, or areas of the city with an abundance of vacant land. Also, several of the Areas of Growth are in or near downtown. Areas of Growth provide Tulsa with the opportunity to focus growth in a way that benefits the City as a whole.
areas will provide housing choice and excellent access to efficient forms of transportation including walking, biking, transit, and the automobile.”

Transportation Vision:

Major Street and Highway Plan: None

Trail System Master Plan Considerations: None

Small Area Plan: None

Special District Considerations: None

Historic Preservation Overlay: None

DESCRIPTION OF EXISTING CONDITIONS:

Staff Summary: The property is undeveloped and has been historically used for rearing cattle and other agricultural purposes.

Environmental Considerations: Tulsa regulatory flood plain bisects the property in two locations. Both of those flood plain areas have been maintained as open spaces in MPD-1 and will be protected from future development.

INTRODUCTION

PROJECT DESCRIPTION

Concord is a new master planned community located in eastern Tulsa, Oklahoma that utilizes New Urbanism design principals in order to create a vibrant, walkable, environmentally sustainable, and economically diverse community. Concord is proposed to be a mixed-use master planned community consisting of multiple housing types, recreational, civic, and commercial uses surrounded by open space and parks. The design and inspiration for developing Concord was born out of the idea that well designed, attractive, and sought after walkable communities aren't just communities people should have to vacation to in order to experience.

The development is seeking rezoning under the Master Plan Development (MPD) zoning designation in order to construct a variety of housing typologies that more closely reflect urban lot and setbacks standards, implement more pedestrian friendly thoroughfares standards, and allow for a mix of residential and neighborhood commercial uses all within the same development project.
FUNDAMENTAL ELEMENTS OF NEW URBANISM

In general, there are two patterns of urbanism that exists in the United States: the Traditional Neighborhood, which was the model of development from the first settlement to World War II, and Suburban Sprawl which has been the model since World War II. While both models accommodate people and their activities, the principal difference is that the Suburban Sprawl model is based upon environmental, social, and economic deficiencies that inevitably choke sustained growth. On the other hand, the Traditional Neighborhood model has several physical, social, and economic attributes that provide several positive consequences that help to sustain a pattern of liveability and economic vitality.

The social and environmental benefits of a New Urbanists community result from certain physical and organizational characteristics. An authentic New Urbanism Neighborhood should includes most of the following:

1. Development should preserve sensitive natural and cultural areas as permanent open space.
2. The basic increment of development should be a walkable, diverse pedestrian walking shed that forms a neighborhood.
3. The neighborhood should have a discernible center to serve as community gathering space.
4. The pedestrian walking shed should be a five to ten-minute walk to the neighborhood center. This distance averages one-quarter of a mile.
5. There should be shops within, or in proximity to, the neighborhood sufficiently varied to satisfy ordinary daily household needs.
6. The Neighborhood should incorporate a variety of places to work, including those that enable work at the dwelling.
7. The Neighborhood should incorporate a variety of dwelling types, so that younger and older people, single household and families can be housed.
8. An elementary school should be available within one mile of most dwellings.
9. That there are small playgrounds and/or pocket parks near every dwelling unit.
10. Thoroughfares within the neighborhood be a network, connecting whenever possible, to adjacent thoroughfares in order to provide a variety of route options and disperse traffic.
11. That thoroughfares be designed to slow traffic, creating an environment appropriate for pedestrians, bicyclists, as well as automobiles.
12. Building frontages should collectively support pedestrian streetscapes and mask most parking lots.
13. That certain prominent sites are reserved for civic buildings. Buildings for meeting, education, religion, or culture are located at the termination of street vistas or at the Neighborhood Center.

When these basic design principals are utilized, a New Urbanism Neighborhood can have several positive consequences:

- By bringing most of the activities of daily living into walking distance, everyone (especially the elderly and the young) gain independence of movement.
- By reducing the number and length of automobile trips, traffic congestion is minimized; the expense of road construction and long-term maintenance are limited, and air pollution is reduced.
- By providing walkable streets and squares of comfortable scale and distance, neighbors can come to know each other and to watch over their collective security.
- By providing a full range of housing types and work places, age and economic classes are integrated and the bonds of an authentic community are formed.
- By providing civic buildings and spaces, democratic initiatives are encouraged and the connection with ones fellow neighbor and community is facilitated.
COMPREHENSIVE PLAN GUIDING PRINCIPALS

"A great city doesn't just happen...it requires considerable time, discussion, citizen participation, leadership and creativity. There are times in every great city's history that are particularly pivotal, where forward thinking decisions play a critical role in the city's future success. Now is such a time for Tulsa."

The City's Comprehensive Plan represents the long-term aspirations for how Tulsa will look, feel, and function. The vision outlined in the Comprehensive Plan serves as a guide in order to set planning goals and policies related to Land Use, Housing, Transportation, and Parks, Trails, and Open Space. Concord is a community the first of its kind in Tulsa that closely aligns with the city's long term vision and will help Tulsa meet the ever growing demand for walkable communities.

THE VISION MAP & FUTURE LAND USE

The Comprehensive Plan envisions the creation of a series of new development centers that will be designed to provide people with access to many goods and services in a relatively small area. The proposed Eastgate Metroplex Center located at East 21st street and South 145th East Avenue currently serves as an employment center and is located within three miles of the Concord Community. Under the comprehensive plan vision, the employment center will be enhanced with transit services to downtown and neighborhoods beyond.

The Comprehensive Plan envisions that undeveloped or vacant land surrounding the proposed center provide new homes in compact, pedestrian friendly communities that are predominantly single-family, but also include townhomes, apartments, and condos. The Concord Community project site is designated as a new neighborhood which is should generally be organized around a town center where grocery stores, retail shops, and services are located within a short walking or driving distance.

The community of Concord aligns development with the Comprehensive Plan's Future Land Use Vision by creating a pedestrian friendly, walkable

Tulsa's Vision Map depicts the general shape and location of growth and development and the types of transportation infrastructure that should serve them.
community designed around a town center. The Town Center will serve as the heart of the community and will provide neighborhood scale retail, office, and commercial activity. Mixed use commercial activities such as a neighborhood market, small shops, a local coffee shop/hang out and community co-working space for small office use are proposed within the Town Center. These mix of uses will be built around a central green that serves as gathering space for community events such as yoga on the green, movies on the green food trucks, festivals, and an outdoor farmers markets. In addition, recreational amenities such as a community pool and workout center are envisioned within the Town Center. A robust and well connected network of sidewalks and multi-purpose trails will connect residents to the community Town Center, as well as future planned thoroughfares and transit corridors via the Lynn Lane corridor.

TRANSPORTATION

"To grow Tulsa's economy, to enhance its neighborhoods, to invigorate the business community and to increase tax revenue and thus fulfill the vision for Tulsa, transportation and land use must be intricately coordinated. In some cases transportation should set the course for desired developments patterns to occur. The design of transportation facilities has a great impact on the marketability of an area and the type of land development forms that will occur.

The Comprehensive Plan states that transportation decisions should be focused on improving the range and quality of Tulsa’s travel options, supporting land use goals and maintaining fiscal sustainability. Policies to support this vision and its goals should encourage development with an interconnected and diverse street pattern to ease congestion, more evenly distribute traffic, and offer flexibility of routes. New transportation routes should consider aesthetic needs as an equal to vehicular capacity demands when planning and designing transportation right-of-ways. Lastly, the Comprehensive Plan seeks to implement a context sensitive solutions approach to transportation infrastructure by recognizing that flexibility in project development and design is necessary to balance safety, mobility, economic development, and environmental issues. New neighborhoods should be governed by subdivision standards that promote good street connectivity.
The relationship between the design of a transportation facility (i.e., how often it accommodates driveways, how wide are its lanes, whether it has on-street parking, whether it has street trees, etc.) and the land uses it serves is critical to the success of a walkable community. Well-designed streets set the stage for many dimensions of community life and can have a profound effect on the image and identity of a neighborhood. The Comprehensive Plan calls for the use of Residential Collector streets in new residential neighborhoods. These collector streets place a higher priority on landscaped medians, tree lawns, sidewalks, on-street parking, and bicycle lanes than the number of travel lanes. The streets consist of two or four travel lanes, but place a higher priority on pedestrian and bicycle friendliness than on auto mobility.

In keeping with the Comprehensive Plan's Transportation Vision for new neighborhood streets and thoroughfares, a well connected street grid with a context sensitive design approach for all streets within the Concord community has been utilized. All streets have been designed to enhance the pedestrian experience in order to promote walking and biking. Streets are lined with street trees, sidewalks, building entries, and ample windows in commercial areas which make walking more attractive. Vehicular travel lanes have been reduced in width and traffic islands used in conjunction with on-street parking have been utilized in order to slow traffic and create safer pedestrian street crossings at intersections. In addition to the complete network of sidewalks, a multi-use trail system is utilized throughout the development which allows residents to walk or bike directly to the Town Center as well as multiple pocket parks and open spaces within the community. Alleys and rear garages are utilized throughout the plan so street corridors aren’t dominated by drive way curb cuts, unattractive garage doors, and large front yard setbacks. This design strategy also allows for usable front porches to be located along street frontages in order to promote eyes on the street and opportunities for impromptu community connections.

**HOUSING**

"Nationally, households are getting smaller and older. As the senior population continues to grow, it will drive demand for smaller, more easily-maintained homes that are located closer to services and shopping. Additionally, as seniors tend to have lower and/or fixed incomes, housing units targeted for the senior market may have to be less costly than a typical single-family home."

The Comprehensive Plan states that Tulsa has an opportunity to augment its existing housing supply with types of housing which, though they may be relatively new to Tulsa, have been built in other cities with much success. In particular, Tulsa has an opportunity to develop new single-family homes on lots ranging in size from 3,500 to 5,000 square feet. These typologies include small lot single-family designs with homes oriented around a communal courtyard or cottage style homes while others housing typologies could be designed in more traditional patterns. These housing types should be permitted in new and existing residential neighborhoods where appropriate. Within the Comprehensive Plan’s priorities, goals,
and policies section, Housing Priority Goal 1.4 states that the city should work with the development community and other stakeholders to plan, design, and build one or more catalytic mixed-use projects based on the PLANiTulsa innovative building model prototypes.

The Concord Community furthers the Comprehensive Plans goals and vision by providing a broad range of housing options that responds to the demographic trends of smaller households, an aging population, and the need to attract a young professional workforce that top employers are constantly seeking when looking for a place to locate their businesses. Rather than segregating housing by entry price points and finish quality, a variety of housing types, sizes, and lot configurations, all with the same finish out quality, are mixed throughout the community. This ensures that the community achieves a mix of ages, household sizes, as well as economic and social vitality.

PARKS, TRAILS, AND OPEN SPACE

"The Vision for Tulsa calls for integrating natural areas into the fabric of the city. Access to Tulsa's environments should not just be found in the suburbs but also throughout the city, in the form of pocket parks, street trees, large scale regional parks, nature parks, riverfront trails, community gardens, and undeveloped natural areas."

The Comprehensive Plan states that parks, trails, and open space-related land use decisions should focus on ensuring that Tulsans live within walking distance or biking distance of a quality neighborhood park and that Tulsa's natural environment be integrated into the fabric of the city. The Plan seeks to promote low impact development strategies and designs as a way to manage stormwater runoff. These strategies should emulate natural water flow, minimize land disturbance, and incorporate natural landscape features into the built environment. Other strategies for implementation include developing alternative street designs and standards which allow for narrower streets and associated infrastructure, resulting in less pavement and promoting the use of alternative landscaping that is native or climate tolerant and erosion resistant.

The Concord Community utilizes an environmentally sustainable approach by preserving critical floodplain and riparian habitat and turning these areas into a robust network of parks, multi-use trails, and natural open space. The project preserves the natural tree canopy within the these corridors and will utilize a native plant pallet of grasses, wildflowers, and wetland habitat. This ecosystem of trees, shrubs, soils and plants within the parks and open space filter environmental pollutants to cleanse stormwater before it reaches streams and channels. They also serve as a natural filtration system that allows rainwater to naturally recharge groundwater supplies. In addition, housing is clustered on small lots in order to preserve large amounts of common open space that promotes community gathering while also accommodating green storm water infrastructure practices. A functioning wetland that provides both stormwater detention and natural plant and wildlife habitat will serve as a front door to the development.

Several pocket parks are planned for throughout the development and will serve as dual purpose spaces by serving as playgrounds, community gardens, and open space while also accommodating stormwater detention during rain fall events. An interconnected network of sidewalks and trails link these pocket parks with natural open space and provide ample opportunities for exercise, physical activity, and will help to build social capital and a sense of community by giving residents a place to gather and develop human relationships.
PROCESS

MASTER PLAN DEVELOPMENT REGULATIONS

The Concord Master Plan Development Regulations have been created in order to guide the building of the community of Concord. These development regulations ensure that all new buildings, community open space, landscaping and streetscapes are harmonious with each other in order to achieve the quality and character envisioned for the community.

The code further ensures that the adheres to a community vision with the following characteristics:

- A Town Center with a mix of neighborhood commercial and civic uses be located in close proximity to all residents within the neighborhood.
- A variety of thoroughfares serve the needs of both the pedestrian and the automobile.
- Community spaces in the form of squares, greens, pocket parks, playgrounds, and natural areas provide places for social activity and recreation.
- Building frontages and their character define the public space.
- Civic buildings reinforce the identity of the community and provide places for assembly.

The Concord Master Plan Design Code shall be administered by The Concord Town Planner. The Town Planner shall be established by the property owner and shall be a professional urban planner, licensed landscape architect, licensed architect, or a professional with equal credentials. The Town Planner shall review all development and development improvements for adherence to the Design Code. When necessary, the Town Planner shall work with INCOG staff to enforce the regulations outlined in the code. For matters regarding urban development structure and aesthetics, the provisions of this Code shall take precedence over local zoning codes, subdivisions regulations, engineering standards, and other regulation ordinances. In matters of health and safety, the local zoning codes and ordinances shall take precedent over the provisions of this Code.

Amendments

Amendments/waivers to provisions of this Code are considered unique and are not to set a precedent for future amendments/waivers. Amendments/waivers may be granted on the basis of hardship, merit, or excellence. Amendments/waivers regarding urban development structure and aesthetics shall be granted by the Town Urban Planner.

For amendments/waivers related to matters of health and safety, the Tulsa Planning Commission and City Council shall grant approval through the public hearing process. Major amendments, which would represent a significant departure from the approved development standards, shall require compliance with the notice and procedural requirements of the original Master Plan Development. Minor amendments to the MPD may be granted by Tulsa Planning Commission administratively so long as substantial compliance is maintained with the approved MPD and the purposes and standards of the MPD provisions hereof.

The following may be considered minor amendments for Tulsa Planning Commission approval:

- Adjustment of internal development area boundaries, provided the allocation of land to particular uses and the relationship of uses within the project are not substantially altered.
- Limitation or elimination of previously approved uses, provided the character of the development is not substantially altered.
- Addition to previously approved uses, provided the character of the development is not substantially altered.
- Modification of the internal circulation system, provided the system is not substantially altered.
- Changes in points of access, provided the traffic design and capacity are not substantially altered.
The Design Code is a series of prescriptions, some of which are mandatory and others which are only recommendations. Mandatory prescriptions are indicated by the verb shall. Recommendations are indicated by the verb should. Options that are allowed but neither recommended or discouraged are indicated by the verb may. The Design Code consists of five categories to be used in conjunction with one another that cover the entire range of environments ranging from the most public to the most private.

**REGULATING PLAN**
The regulating plan is a map showing the various zoning categories within the development. The regulating plan also shows the form and location of public spaces and the thoroughfares.

**URBAN STANDARDS**
The Urban Standards are a matrix of text and diagrams that regulate aspects of private buildings which affect the public realm. The Urban Standards vary according to the zoning categories depicted on the Regulating Plan. The Building Types Summary defines the building uses allowed in each zoning category. Within the building types there is detailed information such as lot size, setbacks, encroachments, and building height.

**THOROUGHFARE STANDARDS**
The Thoroughfare Standards are a series of drawings, specifications, and dimensions that assemble vehicular and pedestrian ways into specialized street corridor characters and capacities. These specify travel lanes, parking lanes, curb type and radii, planters, street trees, street lights, sidewalks, and general utility placement locations. The Thoroughfare Plan Diagram illustrates the locations of each thoroughfare within the master plan.

**LANDSCAPE STANDARDS**
The Landscape Standards establish the vision and goals for the overall community aesthetic. The standards provide instructions regarding the location and planting patterns of streetscapes, private yards, private alleys, trails, and community open space such as playgrounds, pocket parks, and the Town Center.

**ARCHITECTURAL STANDARDS**
The Architectural Standards specify the general materials and configurations permitted for walls, roofs, openings, and building facades in order to produce visual compatibility among differing building types. Because urban quality is directly enhanced by architectural harmony but is not dependent upon it, the provisions of the architectural standards may range from liberal to strictly enforced.
The regulating plan is a map showing the various district categories within the development. The regulating plan also shows the form and location of public spaces and the thoroughfares.

RESIDENTIAL STREET A

Overview
Residential Street A consists of the standard City of Tulsa fifty (50) right-of-way with twenty-six (26) feet of pavement that accommodates two-way vehicular traffic and one sided parallel on-street parking.

Curbs and Radii
The frontage utilizes roll up curbs drained by inlets. A maximum radius of twenty-five (25) feet shall be utilized at intersections.

Sidewalks and Landscaping
Five (5) foot minimum wide pedestrian sidewalks shall be located on both sides of the street. The landscaping shall consists of street trees planted in a seven (7) foot minimum planter strip located along the back of the curb. Landscaping shall not impede visibility within intersection site triangles.

Utilities
Water line utilities shall be located in the drive lane or on-street parking paving area. Final placement should consider proximity to street trees and as much as possible ensure that future utility maintenance does not interfere with street tree plantings. Final dedication of right-of-way and specific utility locations are to be determined and approved during the Platting Phase of development.

Note: The specific design for the neighborhood entry points located off S. 177th E. Ave./Lynn Lane is not included in this document. Final design of entry architectural elements, landscaping, number of lanes, and turning radii are to be determined during the platting phase of development.

RESIDENTIAL STREET B

Overview
Residential Street B is designed with narrower travel lanes and dedicated on-street parking to slow vehicular traffic speeds, provide on-street guest parking in residential areas mostly served by alley access, and to create a more pedestrian friendly walking environment. The cross section is a sixty (60) foot wide right-of-way designed with two-way ten (10) foot wide drive lanes and dedicated eight (8) foot of on-street, parallel parking.

Curbs and Radii
The frontage utilizes roll up curbs drained by inlets. A maximum radius of twenty-five (25) feet shall be utilized at intersections.

Sidewalks and Landscaping
Five (5) foot wide minimum pedestrian sidewalks shall be located on both sides of the street. The landscaping shall consists of street trees planted in a seven (7) foot wide minimum planter strip located along the back of the curb. Landscaping shall not impede visibility within intersection site triangles.

Utilities
Water line utilities shall be located in the drive lane or on-street parking paving area. Final placement should consider proximity to street trees and as much as possible ensure that future utility maintenance does not interfere with street tree plantings. Final dedication of right-of-way and specific utility locations are to be determined and approved during the Platting Phase of development.
**RESIDENTIAL STREET B**

- **Street Type:** Residential Street

THOROUGHFARE STANDARDS

TOWN CENTER MAIN STREET

Overview
Town Center Main Street is designed to reflect the character and pedestrian friendly atmosphere of a traditional downtown main street. The cross section is a sixty-five (65) foot right-of-way designed with two-way ten (10) foot wide drive lanes and designated eight (8) foot of on-street, parallel parking.

Curbs and Radii
The frontage has raised vertical curbs drained by inlets. Curb bump outs with a maximum radius of fifteen (15) feet shall be utilized at intersections to create safer, shorter, and more visible pedestrian crossings. Special paving at intersections should be utilized to enhance the main street character and create a sense of arrival into the district.

Sidewalks and Landscaping
Streetscape amenities such as street trees, landscaping, pedestrian scaled lighting, and streetscape furniture is provided within a dedicated amenity zone space located on both sides of the street. This amenity zone creates separation from the vehicular lanes and ensures a clear walking zone for pedestrian traffic along the sidewalk. The commercial side of the street shall have a minimum of seventeen (17) foot wide sidewalk. Within that seventeen feet, a minimum of seven (7) feet from the back of curb shall be dedicated to the amenity zone. The residential side of the street shall have a minimum of five (5) foot wide sidewalk. Landscaping shall not impede visibility within intersection site triangles.

Utilities
Water line utilities shall be located in the drive lane or on-street parking paving area. Final placement should consider proximity to street trees and as much as possible ensure that future utility maintenance does not interfere with street tree plantings. Final dedication of right-of-way and specific utility locations are to be determined and approved during the Platting Phase of development.

Landscaping on the commercial side of the street shall consists of single tree species with an upright form. Trees shall be planted in tree wells with either grates, ground cover and/or season color, have a consistent spacing, and be limbed up to ensure clearance for pedestrians, storefronts and residential entries. Landscaping on the residential side has more flexibility in design and may use either tree wells with grates or linear planters to accommodate ground cover and seasonal color.

MAIN STREET BOULEVARD

Overview
The Main Street Boulevard is designed to be an extension of the urban style Town Center Main Street thoroughfare but with a residential context located along both sides of its frontage. The boulevard is designed on a linear axis leading into the Town Center and helps to establish prominent and a sense of arrival into the more urban district of the community. The cross section is an eighty-five (85) foot wide right-of-way designed with two-way ten (10) foot wide drive lanes, dedicated eight (8) foot of on-street, parallel parking, and a twenty-seven (27) foot center island.

Curb and Radii
The frontage utilizes roll up curbs drained by inlets. In order to provide consistently throughout the Town Center area, curb bump outs with a maximum radius of fifteen (15) feet shall be utilized at special intersections to create safer, shorter and more visible pedestrian crossings. Special paving at intersections should be utilized to enhance the main street character and create a sense of arrival into the district.

Sidewalks and Landscaping
Five (5) foot minimum wide pedestrian sidewalks shall be located on both sides of the street. The landscaping shall consists of street trees planted in a six (6) foot minimum planter strip located along the back of the curb. Trees shall be planted within the center island but shall not be planted within the ten (10) foot load bearing Fire Lane. The use of creative, low-impact stormwater solutions within planting areas are encouraged along the street and center median frontages. Landscaping shall not impede visibility within intersection site triangles.

Utilities
Water line utilities shall be located in the drive lane or on-street parking paving area. Final placement should consider proximity to street trees and as much as possible ensure that future utility maintenance does not interfere with street tree plantings. Final dedication of right-of-way and specific utility locations are to be determined and approved during the Platting Phase of development.

Special Provisions: Fire Lane
In order to accommodate a required twenty (20) foot clear fire lane, a roll up curb shall be utilized along the entire length of the center island and provide a ten (10) foot wide pervious, load bearing surface system on both sides of the island (refer to Private Lanes with Fire Access thoroughfare standards on page 28 for images of load bearing grass paving system).
**MAIN STREET BOULEVARD**

- **Street Type:** Boulevard

- **Planter Width:** 6 ft. min. Planter & 27 ft. Center Median
- **Street Tree Spacing:** Required, 35 ft. on center
  Center Median Variable Spacing
- **Sidewalk Width:** 5 ft. min., both sides of street
- **Utility Placement:** Water line to be located in the street paving area, engineering to determine final location
- **Special Provisions:** 10 ft. pervious, load bearing surface, both sides of island
THOROUGHFARE STANDARDS

RESIDENTIAL BOULEVARD

Overview
The Residential Boulevard is designed as a prominent thoroughfare design feature into the Concord Hill community and is an extension of the community entrance located off of E. 31st Street. The boulevard's ample width is designed to provide linear community open space. The cross section is a one hundred and five (105) foot wide right-of-way designed with two-way thirteen (13) foot wide drive lanes, dedicated eight (8) foot on-street, parallel parking and a forty-one (41) foot wide center island.

Curb and Radii
The frontage utilizes roll up curbs drained by inlets. A maximum radius of twenty-five (25) feet shall be utilized at intersections.

Sidewalks and Landscaping
Five (5) foot minimum wide pedestrian sidewalks shall be located on both sides of the street. The landscaping shall consist of street trees planted in a six (6) foot minimum planter strip located along the back of the curb. Trees shall be planted within the center island but shall not be planted within the seven (7) foot load bearing Fire Lane. The use of creative, low-impact stormwater solutions within planting areas are encouraged along the street and center median frontages. Landscaping shall not impede visibility within intersection site triangles.

Utilities
Water line utilities shall be located in the drive lane or on-street parking paving area. Final placement should consider proximity to street trees and as much as possible ensure that future utility maintenance does not interfere with street tree plantings. Final dedication of right-of-way and specific utility locations are to be determined and approved during the Platting Phase of development.

Special Provisions: Fire Lane
In order to accommodate a required twenty (20) foot clear fire lane, a roll up curb shall be utilized along the entire length of the center island and provide a seven (7) foot wide pervious, load bearing surface system on both sides of the island (refer to Private Lanes with Fire Access thoroughfare standards on page 28 for images of load bearing grass paving system).

PRIVATE LANE

Overview
Private Lanes are vehicular ways located to the rear of lots that provide access to service areas, parking, and outbuildings and also contain utility easements. The cross section contains sixteen (16) feet of pavement within a twenty (20) foot right-of-way. An additional five (5) foot min. setback for all structures on both sides of the private lane right-of-way ensures a total of thirty (30) feet clear area for utilities such as sanitary sewer and franchise utilities.

Curbs and Radii
In order to distinguish private lanes from residential streets, entrances from the street into private lanes shall utilize a flared, tapered curb cut design. Private Lanes shall not contain curbs and may be designed with inverted crowns at the center of the pavement for drainage.

Landscaping
A five (5) foot minimum setback is required for all structures located within the private lane. A two (2) foot maximum overhang is permitted within the structure setback. Landscaping such as ornamental shrubs, grasses, and/or ground cover shall be planted within the structure setback to enhance the aesthetics and safety of rear private lanes. Landscaping shall not impede visibility within intersection site triangles.

Utilities
Sanitary sewer line utilities shall be located under the private lane pavement. A thirty (30) foot clear zone within the private lane provides space for rear yard utility easements and placement of franchise utilities.

THOROUGHFARE STANDARDS

PRIVATE LINES WITH FIRE ACCESS

Overview
Private lanes with fire access are vehicular ways located to the rear of lots that provide access to service areas, parking, and outbuildings, contain utility easements and allows for fire truck emergency access. The cross section contains sixteen (16) feet of pavement within a twenty (20) foot right-of-way. An additional five (5) foot min. setback for all structures on both sides of the private lane right-of-way ensures a total of thirty (30) feet clear area for utilities such as sanitary sewer and franchise utilities.

Curbs and Radii
In order to distinguish private lanes from residential streets, entrances from the street into private lanes shall utilize a flared, tapered curb cut design. Private Lanes shall not contain curbs and may be designed with inverted crowns at the center of the pavement for drainage.

Landscaping
A five (5) foot minimum setback is required for all structures located within the private lane. A two (2) foot maximum overhang is permitted within the structure setback. Landscaping such as ornamental shrubs, grasses, and/or ground cover shall be planted within the setback to enhance the aesthetics and safety of rear alleyways. Landscaping shall not impede visibility within intersection site triangles.

Utilities
Sanitary sewer line utilities shall be located under the private lane pavement. A thirty (30) foot clear zone within the private lane provides space for rear yard utility easements and placement of franchise utilities.

Special Provisions: Fire Lane
Most lots within the development, whether accessed directly from the street or from a rear private lane accommodate emergency fire access directly from the street frontage, however, some private lanes within the development will need to function as Fire Lanes in order to meet emergency requirements. These private lanes have been identified on the Master Thoroughfare Plan and shall provide an additional two (2) feet of pervious, load bearing surface system on both sides of the sixteen (16) of pavement, for a total of twenty (20) feet, in order to accommodate fire trucks within a private lane.

GONCORD: MASTER PLAN DEVELOPMENT STANDARDS
OVERVIEW

The Urban Standards are a matrix of text and diagrams that regulate those aspects of private buildings which affect the public realm. The Urban Standards vary according to the zoning district identified on the Regulating Plan. The Summary Table defines the Building Type that is permitted within each zoning district. Within each Building Type, there are detailed standards and design guidelines that address lot sizes, setbacks, encroachments, building height, and other specific urban provisions.

LEGEND
- Town Center District (TC)
- Neighborhood Center District (NC)
- General Neighborhood District (GN)
- Open Space

TULSA, OKLAHOMA
CONCORD: MASTER PLAN DEVELOPMENT STANDARDS
A detached house is a single-family residence on its own lot. Garages and/or surface parking shall be provided in the rear yard, if possible, accessed from a private lane. Parking may be accessed from the front service if urban provisions are adhered to.

A Bungalow Court is a series of single-family dwellings that front a linear shared green space. The Bungalow Court accommodates parking in the rear.

A Cottage Court is a small single-family dwelling on a small lot that is clustered around a common open space or shared courtyard. Cottage Courts may share one or more outbuildings. Surface parking shall be provided and accessed via a rear private lane.

A Duplex is a residential building occupied by 2 dwelling units, both of which are located on a single lot that is not occupied by other principal residential buildings. Units are attached and may be located on separate floors, side-by-side, or front-to-back.

A Townhouse is a single-family dwelling that shares a party wall with another of the same type and occupies the full frontage line of a lot. Townhouses accommodate parking in the rear via a private lane.

A Multi-Unit House is a principal building that contains 3 or 4 dwelling units that share common walls and/or common floors/ceilings. Multi-unit houses have the appearance of large detached houses.

A Mixed-Use Building is a principal building occupied by one or more commercial, office, and/or entertainment uses. One or more residential dwelling units may be located above the ground floor use.
URBAN STANDARDS

DETACHED HOUSE

Overview
A detached house is a principal residential building, other than a manufactured housing unit or mobile home, that contains only one dwelling unit and that is located on a single lot that is not occupied by other principal residential buildings. Detached houses are not attached to and do not abut other dwelling units.

Urban Provisions
Principal Building and Yards
- A Detached House shall be oriented to and have a main entry accessible from the primary street.
- Stoops, balconies, porches, and bay windows may encroach within the front yard and corner lot side yard setbacks but shall provide a 5' min. setback from the public right-of-way.
- Where possible, buildings located on corner lots should utilize porches and stoops that wrap the corner of the structure in order to provide a residential entrance/presence along both street frontages.
- Fences, garden walls, and hedges are allowed and further defined by the neighborhood covenants and restrictions.
- Building height shall be measured from grade elevation to eave line. Refer to Section 90.160-A of the Tulsa zoning code for height measurements regarding sloped sites.

Parking
- Parking shall be 2 spaces minimum per unit on each individual lot.
- Front loaded driveways are permitted on lots with widths of 45 feet or greater.
- Front loaded garage doors shall be recessed from the primary building facade a minimum of 20 feet.
- Units with front loaded garages are highly encouraged to utilize detached and/or attached garages that are set toward the back of the lot or garages that are turned to the side where the doors do not directly face the street frontage.
- Front loaded driveways shall have a 20' maximum pavement width.
- For lots with parking access off of a rear private lane, the maximum driveway paving width shall be no larger than 1' either side of the garage door.
- Parking within the private lane drive aisle is not permitted.

Open Space
- A Detached House shall provide 15% min. of the total lot area as open space.
- Lot areas that are not occupied by buildings, driveways, or parking areas and are generally usable by residents shall be counted toward satisfying the minimum open space requirement.

Special Standards
- Front loaded driveways shall not be permitted within the Town Center District. All parking shall be accessed via a rear private lane.

URBAN STANDARDS

BUNGALOW COURT

Overview
A Bungalow Court is a series of single-family dwellings that front a linear shared green space. Generally, there are two different approaches for how the building unit can be positioned on the lot. Option one has buildings shifted to one side of the lot so that there is a more usable side yard on one side of the house and no yard on the other side. Option two has buildings with standard sidewalk yard setbacks on both sides of the common lot line. The Bungalow Court accommodates parking in the rear.

Urban Provisions
Principal Building and Yards
- Bungalow Court houses shall be oriented to and have a main entry onto a linear green that is accessible by all residents in the Bungalow Court development.
- Porches that front the linear greenbelt are required
- Where possible, buildings located on corner lots that abut a primary street should utilize a larger setback and have porches and/or stoops that wrap the corner of the structure in order to provide a residential entrance/presence along both the street and the linear green frontages.
- Front loaded garage are not permitted
- Fences, garden walls, and hedges are allowed and further defined by the neighborhood covenants and restrictions.
- Building height shall be measured from grade elevation to eave line. Building height shall be measured from grade elevation to eave line. Refer to Section 90.160-A of the Tulsa zoning code for height measurements regarding sloped sites.

Parking
- Parking shall be 2 spaces minimum per unit on each individual lot
- Parking shall be accessed via a rear private lane
- Driveway paving width shall be no larger than 1' either side of the garage door width.
- Parking within the private lane drive aisle is not permitted.

Open Space
- A Bungalow Court shall provide 15% min. open space per lot.
- Lot areas that are not occupied by buildings, driveways, or parking areas and are generally usable by residents shall be counted toward satisfying the minimum open space requirement.
- The total required open space shall be provided in a front yard, linear common green with a minimum width of 35'.
- Linear greens shall provide required landscaping as outlined in the neighborhood covenants and restrictions.

CONCORD: MASTER PLAN DEVELOPMENT STANDARDS
COTTAGE COURT

Overview
A Cottage Court is a small single-family dwelling on a small lot that is clustered around a common open space or shared courtyard. Cottage Courts may share one or more outbuildings. Surface parking shall be provided and accessed via a rear yard alley.

Urban Provisions
Principal Building and Yards
- Cottage Court development must contain at least 4 and no more than 10 houses arranged around at least two sides of a courtyard or common open space.
- Cottage Court houses shall be oriented to and have a main entry onto a courtyard or common green space area that is accessible by all residents in the cottage court development.
- Stoops and porches that front the common green are highly encouraged
  - Where possible, buildings located on corner lots that abut a primary street should utilize a larger setback and have porches and/or stoops that wrap the corner of the structure in order to provide a residential entrance/presence along both the street and the common green frontages...
- Fences, garden walls, and hedges are allowed and further defined by the neighborhood covenants and restrictions.
- Building height shall be measured from grade elevation to eave line. Building height shall be measured from grade elevation to eave line. Refer to Section 90.180-A of the Tulsa zoning code for height measurements regarding sloped sites.

Parking
- Parking shall be 1 space minimum per unit
  - Parking shall be accessed via a rear private lane and provided in a shared surface lot and/or a shared garage/covered space.
  - Parking within the private lane drive aisle is not permitted.

Open Space
- A Cottage Court shall provide 15% min. open space per lot.
  - Lot areas that are not occupied by buildings, driveways, or parking areas and are generally usable by residents shall be counted toward satisfying the minimum open space requirement.
- The total required open space shall be provided in a front yard, common green with a minimum width of 45'.
- Linear greens shall provide required landscaping as outlined in the neighborhood covenants and restrictions.

URBAN STANDARDS

DUPLEX

Overview
A Duplex is a principal residential building occupied by 2 dwelling units, both of which are located on a single lot that is not occupied by other principal residential buildings. Units are attached and may be located on separate floors, side-by-side, or front to back.

Urban Provisions

Principal Building and Yards
- A Duplex units shall be oriented so and have its main entries accessible from the primary street.
- Stoops, balconies, porches, and bay windows may encroach within the front yard and corner lot side yard setbacks but shall provide a 5’ min. setback from the public right-of-way.
- Fences, garden walls, and hedges are allowed and further defined by the neighborhood covenants and restrictions.
- Building height shall be measured from grade elevation to eave line. Building height shall be measured from grade elevation to eave line. Refer to Section 90.100-A of the Tulsa zoning code for height measurements regarding sloped sites.
- *Side common yard setbacks shall be 5’ min. unless a driveway/parking court is shared between adjacent properties.

Parking
- Parking shall be 2 spaces minimum per unit on each individual lot
- Street facing garage doors on a Duplex unit are prohibited,
  - Garage doors accessed from a front driveway shall be turned to the side of the unit.
  - Front loaded driveways are permitted but shall have a 15’ max. pavement width.
- For lots with parking access off of a rear private lane, the maximum driveway paving width shall be no larger than 1’ either side of the garage door width.
- Parking within the private lane drive aisle is not permitted.

Open Space
- A Detached House shall provide 15% min. of the total lot area as open space.
  - Lot areas that are not occupied by buildings, driveways, or parking areas and are generally usable by residents shall be counted toward satisfying the minimum open space requirement.

Parking

<table>

TOWNHOUSE

Overview
A Townhouse is a single-family dwelling that shares a party wall with another of the same type and occupies the full frontage line of a lot. Townhouses should be located in more urban areas. Parking shall be accommodated in the rear.

Urban Provisions
Principal Building and Yards
- Townhouses shall be oriented to and have a main entry accessible from the primary street.
- Stoops, balconies, porches, and bay windows may encroach within the front yard and corner lot side yard setbacks.
- Townhouses must be affixed to a permanent foundation.
- Fences, garden walls, and hedges are allowed and further defined by the neighborhood covenants and restrictions.
- Building height shall be measured from grade elevation to eave line. Building height shall be measured from grade elevation to eave line. Refer to Section 90.160-A of the Tulsa zoning code for height measurements regarding sloped sites.

Parking
- Parking shall be 2 spaces minimum per unit on each individual lot.
- Front loaded driveways are prohibited.
- Parking shall be accessed via a rear private lane.
  - The maximum driveway paving width shall be no larger than 9' either side of the garage door width.
  - Parking within the private lane drive aisle is not permitted.

Open Space
- A Townhouse shall provide 15% min. of the total lot area as open space.
  - Lot areas that are not occupied by buildings, driveways, or parking areas and are generally usable by residents shall be counted toward satisfying the minimum open space requirement.
  - * For townhouses located within the Town Center District, required open space may be provided on each townhouse lot or may be provided in outdoor common areas within the Town Center as designated on the recorded plot or in a separately recorded legal instrument. For townhouses located within the Neighborhood Center District, required open space shall be provided on each lot.

Open Space
- Open Space per Unit
  - *(15% min. of total lot area)

URBAN STANDARDS

MULTI-UNIT HOUSE

Overview
A Multi-Unit House is a principal residential building that contains 3 or 4 dwelling units that share common walls and/or common floors/ceilings. Multi-unit houses have the appearance of a large detached house and accommodate parking via a rear private lane.

Urban Provisions
Principal Building and Yards
- A Multi-Unit House shall be oriented to and have only one main entry accessible from the primary street. If the building is located on a corner lot, one building entrance may be visible from each street.
- Stoops, balconies, porches, and bay windows may encroach within the front yard and corner lot side yard setbacks but shall provide a 5' min. setback from the public right-of-way.
- Fences, garden walls, and hedges are allowed and further defined by the neighborhood covenants and restrictions.
- Building height shall be measured from grade elevation to eave line. Building height shall be measured from grade elevation to eave line. Refer to Section 90.160-A of the Tulsa zoning code for height measurements regarding sloped sites.

Parking
- Parking shall be 1.25 spaces minimum per unit on each lot.
- Front loaded driveways are prohibited.
- Parking within the private lane drive aisle is not permitted.
- Parking shall be accessed via a rear private lane.
  - The maximum driveway paving width shall be no larger than 1' either side of the garage door width.
  - A series of garages shall provide a 3' minimum landscape island between driveways.

Open Space
- A Multi-Unit House shall provide 15% min. of the total lot area as open space.
  - Lot areas that are not occupied by buildings, driveways, or parking areas and are generally usable by residents shall be counted toward satisfying the minimum open space requirement.

LOT PARAMETERS

URBAN STANDARDS

MIXED-USE BUILDING

Overview
A Mixed-Use Building is a principal building occupied by one or more commercial, office, and/or entertainment uses. One or more residential dwelling units may be located above the ground floor use. In order to create a pedestrian friendly community core that supports a variety of ground floor active uses and services, Mixed-Use Buildings shall be located in the Town Center District only.

Urban Provisions
Principal Building and Yard
- Mixed-use buildings shall have a primary entrance facing the street.
- Entrance spacing along the primary street shall be 50' max.
- Awnings, canopies, balconies, galleries, and door swings are permitted to encroach within the public right-of-way up to 3' from the back of curb.
- Fences, garden walls, and hedges are allowed and further defined by the neighborhood covenants and restrictions.
- Building height shall be measured from grade elevation to eave line. Building height shall be measured from grade elevation to eave line. Refer to Section 90.180-A of the Tulsa zoning code for height measurements regarding sloped sites.

Transparency
- Ground floor mixed-use buildings facing east toward the Lynn Lane corridor shall provide 50% min. transparency.
- Upper floor units shall have 20% min. transparency
- Recreational structures such as pool houses, showers, storage units, etc. are not subject to the transparency requirements.

Parking
- Parking for commercial, office, and entertainment uses located within the Town Center District shall be shared and will provide a minimum of 60 on-street parallel spaces.
- If future parking is needed it shall adhere to the following provisions:
  - Surface parking lots shall not be permitted between a primary building front and the public right-of-way.
  - Parking lots shall be screened with landscaping from the public right-of-way.

Open Space
- A Mixed-Use Building shall provide 100 sq. ft. min. of open space per unit.
  - Lot areas that are not occupied by buildings, driveways, or parking areas and are generally usable by residents shall be counted toward satisfying the minimum open space requirement.
  - *Required open space shall be provided in outdoor common areas within the Town Center District, as designated on the recorded plat or in a separately recorded legal instrument.

USE REGULATIONS

Uses are listed in the first column of Allowed Use Table 2.0. This code classifies uses into categories and subcategories. In some cases, specific use types are listed in addition to the use categories and subcategories. Building types are defined in the Urban Standards section of this code.

PERMITTED USES
Uses identified with a "P" are permitted as-of-right in the subject zoning district, subject to compliance with any supplemental regulations identified in the final column of Table 2.0 and with all other applicable regulations of this zoning code. Uses identified with a "P*" are uses that are permitted with special standards. The special standards section is identified in the supplemental regulations column in Table 2.0.

PROHIBITED USES
Uses identified with an "*" are expressly prohibited. Uses that are not listed in the table and that cannot be reasonably interpreted to fall within any defined use category are also prohibited.

SPECIAL EXCEPTION USES
Uses identified with an "S" may be allowed if reviewed and approved in accordance with the special exception procedures of Section 70.122 of the Tulsa Zoning Code. Special exception uses are subject to compliance with any supplemental regulations identified in the final column of Table 2.0 and with all other applicable regulations of this zoning code.

SUPPLEMENTAL REGULATIONS
The "Supplemental Regulations" column in Table 2.0 identifies additional regulations that apply to some uses. Unless otherwise expressly stated, compliance with these regulations is required regardless of whether the use is permitted as-of-right or requires special exception approval.

ACCESSORY USES
Accessory uses are not regulated by Table 2.0. Customary accessory uses are allowed in conjunction with principal uses permitted by right or by special exception, subject to review and compliance by the Concord Town Urban Planner.

LANDSCAPE STANDARDS

The Landscape Standards establish the vision and goals for the overall community aesthetic. Specific requirements regarding plant species and private yard landscaping requirements shall be outlined in the Concord covenants and restrictions and filed with the plat. The Concord Community is exempt from the landscape provisions outlined in other City of Tulsa ordinances. The community of Concord will be landscaped to a high-level standard, meeting and exceeding the minimum requirements set out by the City of Tulsa landscape ordinance. All landscaped areas within the Concord community shall be designed by a Landscape Architect or Landscape Designer and shall be reviewed and approved for compliance by the Town Planner. Irrigation is required for all private landscape areas within Concord.

OVERVIEW

The community of Concord provides approximately 36 acres of preserved open space, and is made up of multi-use trails, pocket parks, detention ponds, created wetlands, existing floodplains, and natural riparian areas. The landscape vision seeks to implement a naturalistic prairie aesthetic that is in keeping with native Oklahoma landscapes. Use of ornamental grasses, wildflowers, and drought tolerant plantings shall be utilized throughout the community. Existing riparian corridors and their tree canopies shall be preserved and accommodate space for a multi-use trail. Frontage along Lynn Lane and E. 31st Street shall be landscaped with a mixture of tall prairie grasses, wildflowers, and wetland appropriate plant species. Landscape elements such as natural boulders, berms, and wood fencing material shall be designed and incorporated into the landscape in order to support the natural community aesthetic.

MAINTENANCE

A third party landscape management company will be established at Concord and will be responsible for the maintenance of the landscaped entries, private lanes, perimeter fencing and all reserves and landscape areas as identified on the plat. These areas will be constructed and landscaped to a high standard by the property owner and then turned over to the third party landscape management company for perpetual maintenance.

In addition to the third party landscape management company, a Concord Home Owner's Association (HOA) will be formed. Final covenants and restrictions for the Concord Community will be filed with the final plat and will include the maintenance agreement and other specific rights and requirements for HOA members.
ARCHITECTURAL STANDARDS

OVERVIEW

The Architectural Standards specify the general materials and configurations permitted for walls, roofs, openings, and building facades in order to produce visual compatibility among differing building types.

GENERAL STANDARDS

In general, the architectural aesthetic for the Concord Community will draw from four styles, trending slightly more modern than traditional:

Scandinavian Mid-century Modern
- This modernist style is rooted in the simplified forms found in vernacular Scandinavian architecture and is generally characterized by the creative use of natural materials, minimalism, functional design, simple massing, large windows utilizing views and natural light, and high-pitched roofs with gables. Wood building materials and natural color palettes are popular and every building detail strives to be both necessary and useful, with nothing superfluous.

Farmhouse Barn
- The term “farmhouse” was originally meant as a description of a home situated in an agricultural setting as opposed to a particular style of a home. Farmhouses were developed out of necessity, and they reflected the land, building materials and goods available in their rural location. Typically, a farmhouse draws upon those early colonial homes built in the 1700s, with added elements such as deep front porches. The common thread of a farmhouse is that it is rural, straightforward, and functional.

Modern Victorian
- Rich colors and eclectic details give a wide range of expression to Modern Victorian homes. The historical Victorian style refers to homes built during the reign of Queen Victoria (1837-1901). Builders blended a wide range of styles from Regency to Italianate with ornate brackets, window surrounds, columns, and trim details, utilizing inventive and sometimes whimsical shapes and patterns. Homes are asymmetrical in arrangement with tall porches and make use of distinctive architectural elements such as patterned bricks, barge boards on gable ends, bay windows, and a proliferation of fireplaces.

Industrial
- A love for functional, open spaces and the raw beauty of materials is distinctive of the industrial style of architecture. The homes feature exposed brick walls and structural steel, concrete, or wood as well as large, expansive steel windows. Simplicity, minimalism, and rough textures define the style. Industrial design showcases neutral tones and utilitarian objects, from the earthy to the polished, and often incorporates a love for vintage furniture and accessories inspired by early 20th century design.

Building forms will have simple lines; high-pitched gables and/or low-slope roofs; large windows; a mix of textures, colors, and materials.

To create architectural interest, building facades should incorporate various expressions of structural design elements such as, but not limited to: floor bonding or belt course details, columns, pilasters, piers, quoins; foundation water tables or rustication details; facade articulation and variation in wall plane including patterns of door and window openings through the use of sills, mullions, and other scale providing window elements. Residential buildings should provide a variety of architectural styles, sizes, and lot configurations to promote a diverse and unique community aesthetic. Front porches and/or urban stoops should be utilized on all residential dwellings to promote community interaction at the street.

MIXED-USE TOWN CENTER

The Town Center will serve as the hub of the Concord community. The Town Center District is intended to create a mixed-use, walkable, pedestrian friendly atmosphere that supports a variety of neighborhood serving commercial, retail, restaurant, office and entertainment space surrounded by a urban residential living and community amenity areas. The Town Center buildings will be wood framed construction and will be one to two stories in height. The townhouses will be wood framed construction and will be two to three stories in height. Parking will be accessed from the rear alley and will either be in detached garages or an attached garage within the townhouse unit. Materials will be chosen for durability, ease of maintenance, economy of scale and familiarity within the local market with an emphasis on natural materials. The exterior materials will consist of the following:

SIGNAGE STANDARDS

OVERVIEW
The following sign controls are intended to provide basic direction for how signs are displayed.

GENERAL GUIDELINES
Signage should be artful, creative, add visual interest to the street, and complement the overall building design. Signage should be utilized to identify a business or residential project and be clearly identifiable to customers, yet not be visually objectionable.

Location
- Signs should not obscure architectural elements such as pilasters, cornice lines, capping or openings.

Legibility
- Sign typeface should be clearly legible.

Materials
Signs should be designed of high quality materials consistent with the overall building architecture.

Style
Signs should be of a style representative of the overall building and district character, while ensuring the business is appropriately represented.
- Visually representational rather than textual signs are encouraged
- Signs should be artful, creative and highly graphic.

Orientation
- Signs should be oriented to face pedestrians.

Lighting
- Lights should be subtle and reinforce the overall facade design.
STANDARDS

Signs can contribute significantly to the identity and brand of an area. It is important that they are carefully reviewed and stay consistent with the design intent for Concord.

Location
- Mixed-use buildings shall provide locations on the commercial areas of the building facade that are specifically designed to accommodate changeable tenant signage including wall signs, projecting signs and window signs. Structure, materials, detailing and power sources shall be designed to be readily adaptable and repairable as tenant sign needs change.

Area Calculation
- Sign area is measured by drawing a rectangular box around the most extreme points of a sign. In cases where the sign extends in a second direction greater than 20 degrees from the primary sign face, a second box around the most extreme points of the secondary sign face shall be drawn and added to the area of the primary face to generate the sign total area, see figure below.

Window Signs
- Permanent or temporary window signs shall not exceed 1/3 the area of the window to a maximum of 20 sq. ft. or in which the signs are located.
- Signs shall be of a durable / low maintenance material or adhered or permanently printed on the interior surface of the window.

Wall Signs
- The area of all wall signs shall not exceed 1 sq. ft. per foot of street frontage occupied by the business measured along the wall to which the signs are attached.
- The height of any wall sign shall not exceed 10 ft. for small retail spaces.

Projecting Signs
- The area of projecting signs combined when there are multiple signs shall not exceed 24 sq. ft.
- Projecting signs shall be located no closer than 20 ft. apart or one per retail space.
- The height of a projecting sign shall not exceed 30 ft. or the height of the wall that it is attached.
- A minimum 9 ft. vertical clearance to the sidewalk shall be maintained.
- No part of the projecting sign shall project more than 75% of the horizontal distance from the street property line to the curb-line, or 6 ft. 6 in., whichever is less.
