SECTION I: PUD-705-3 Minor Amendment

Amendment Request:
Amend the development standards to reduce the required building setback along the west boundary of Development Areas A and C from 25 ft to 0 ft. The proposed development will be for a grocery store of approximately 15,000 sf in area. This store is intended to provide groceries and other goods for an underserved area of the City of Tulsa, located within a food desert. The reduction in setback is requested so that the proposed building will be better able to fit on the subject lots with the desired floor area, as illustrated on the site plan provided by the applicant and included with this report.

Staff Comment: This request is considered a Minor Amendment as outlined by Section 30.010.I.2.c(9) of the City of Tulsa Zoning Code.

"Changes in structure heights, building setbacks, yards, open spaces, building coverage and lot widths or frontages, provided the approved PUD development plan, the approved standards and the character of the development are not substantially altered."

Staff has reviewed the request and determined:

1) The requested amendment does not represent a significant departure from the approved development standards in PUD-705.

2) All remaining development standards defined in PUD-705 and subsequent amendments shall remain in effect.

Exhibits included with staff report:
- INCOG zoning case map
- INCOG aerial photo
- INCOG aerial photo (enlarged)
- Applicant Site Plan
- Applicant Landscape Plan
- Applicant Building Elevations

With considerations listed above, staff recommends approval of the minor amendment to reduce the building setback along the west boundary of Development Areas A and C from 25 ft to 0 ft.

REVISED 1/15/2020
SECTION I: CZ-499

DEVELOPMENT CONCEPT: The applicant is proposing to rezone from AG to AG-R to permit single family homes on the subject lot. The Tulsa County Zoning Code requires a minimum of 1 Acre lot area for AG-R with a minimum lot area per dwelling unit of 1.1 Acres. The site is located within the Residential Land Use category of the City of Sand Springs Land Use Master Plan. Based on the proposed use and minimum lot area requirements, the applicant’s proposal is compatible with the recommendations of the Land Use Master Plan for this area.

The subject lot is also currently undergoing a Lot Line Adjustment to split the portion of the lot that is the subject of this rezoning request from the remainder of the lot to the south, which will then be combined with the larger parcel south of the remainder of the lot. This will provide a 30 ft wide access from the combined parcel to West Weaver Road.

DETAILED STAFF RECOMMENDATION:

CZ-499 is non-injurious to surrounding proximate properties;

CZ-499 is consistent with the anticipated future development pattern of the surrounding property therefore;

Staff recommends Approval of CZ-499 to rezone property from AG to AG-R.

SECTION II: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary:

The subject property is located within the fenceline of Sand Springs. The 2030 Sand Springs Land Use Master Plan was adopted June 26, 2017. The City of Sand Springs Planning Department embarked on a community outreach effort to engage citizens in the Comprehensive Planning process. They initiated a community survey that was available in electronic format via social media and the City’s website. The survey was also available in a hard copy that citizens could acquire at several locations. In addition, a web based Interactive Map was launched to obtain citizen participation.

The Land Use Master Plan designates this area as Residential. The Residential category is typically comprised of single-family neighborhoods of varying lot sizes and represents the lowest intensity of all the use categories outside of Agricultural Districts. Dwelling unit densities within the Residential category generally range from 2 to 5 units per acre but density can be as little as 1 or fewer per acre. Areas within the fenceline may not develop to densities any greater than 1 or 2 dwelling units per acre because of the expense of bringing sewer to these locations.
As a result of the many variables involved, the Residential category was not broken apart into two different categories, such as rural or urban.

SECTION I: Z-7525

APPLICANTS DEVELOPMENT CONCEPT:
The existing building and most, if not all, of the surrounding buildings are metal warehouse buildings used for various automotive and light industrial services. Services and business in the area include: Goodyear Tire, Danco Pump and Supply, an aeronautic repair and welding station, several construction contractors, and vehicle and transmission repair shops, to name a few.

The proposed medical marijuana processing and growing uses are not permitted in the CS district but are permitted in the IL district and are consistent with the development pattern of the area and the comprehensive plan designs of the area of employment and area of growth. This development plan will allow for the specific IL uses identified above but otherwise preserve the CS zoning, thereby maintaining the requirement of Board of Adjustment approval for uses such as vehicle services and warehousing.

DETAILED STAFF RECOMMENDATION:
The employment land use designation encourages light manufacturing and high tech uses for clean manufacturing and warehouse uses and,

The surrounding property has been developed with standards and uses only allowed in a CS district and a variety of special exceptions that allow vehicular uses and repair and,

The architectural style of the development in this area is similar to many light industrial development areas and the proposed zoning change with the provisions of the optional plan is consistent with the employment land use designation for the area therefore,

Staff recommends approval of Z-7525 to rezone property from CS to IL with the optional development plan standards outlined in Section II below.

SECTION III: Supporting Documentation
RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary: IL zoning may be appropriate in many areas of Tulsa that are included in areas of employment. In this instance all the surrounding properties and the expected development pattern will continue to be those uses allowed by right or by special exception in a CS district. IL zoning with the optional development plan will continue to give the property owner the opportunity to develop most uses that are allowed in a CS district and provides further opportunities to request some special exception uses that have been previously granted in the neighborhood. The employment land use designation is consistent with that concept of expanded employment growth opportunities.

Land Use Vision:

Land Use Plan map designation: Employment
Employment areas contain office, warehousing, light manufacturing and high tech uses such as clean manufacturing or information technology. Sometimes big-box retail or warehouse retail clubs are found in these areas. These areas are distinguished from mixed-use centers in that they have few residences and typically have more extensive commercial activity.

Employment areas require access to major arterials or interstates. Those areas, with manufacturing and warehousing uses must be able to accommodate extensive truck traffic, and rail in some instances. Due to the special transportation requirements of these districts, attention to design, screening and open space buffering is necessary when employment districts are near other districts that include moderate residential use.

Areas of Stability and Growth designation: Area of Growth
The purpose of Areas of Growth is to direct the allocation of resources and channel growth to where it will be beneficial and can best improve access to jobs, housing, and services with fewer and shorter auto trips. Areas of Growth are parts of the city where general agreement exists that development or redevelopment is beneficial. As steps are taken to plan for, and, in some cases, develop or redevelop these areas, ensuring that existing residents will not be displaced is a high priority. A major goal is to increase economic activity in the area to benefit existing residents and businesses, and where necessary, provide the stimulus to redevelop.

Areas of Growth are found throughout Tulsa. These areas have many different characteristics but some of the more common traits are close proximity to or abutting an arterial street, major employment and industrial areas, or areas of the city with an abundance of vacant land. Also, several of the Areas of Growth are in or near downtown. Areas of Growth provide Tulsa with the opportunity to focus growth in a way that benefits the City as a whole. Development in these areas will provide housing choice and excellent access to efficient forms of transportation including walking, biking, transit, and the automobile.

Transportation Vision:

Major Street and Highway Plan: None that affect rezoning decisions or future development considerations

Trail System Master Plan Considerations: None
Small Area Plan: None

Special District Considerations: None

DESCRIPTION OF EXISTING CONDITIONS:

**Staff Summary:** The existing building and many of the surrounding buildings are moderately sized warehouse style buildings. Many of the structures are being used for automotive repair facilities and other warehouse uses that are allowed uses or have been allowed thorough the special exception process at the Board of Adjustment.

SECTION IV: Relevant Zoning History

ZONING ORDINANCE: Ordinance number 11812 dated June 26, 1970 established zoning for the subject property.

Subject Property:

No Relevant History.

Surrounding Property:

BOA-20487 April 2007: The Board of Adjustment approved a Special Exception to permit automotive restoration in a CS District with conditions for 5 years, on property located at 107 South 111th Avenue.

BOA-18421 May 1999: The Board of Adjustment approved a Special Exception to allow automotive related uses in a CS district to include: sale of automobiles, motorcycles, personal watercraft, boats, motorcycle parts, and motorcycle accessories, as well as the service and repair of motorcycles, subject to no outside storage or sale of any products and no on-street parking related to the use, on property located at 102 South 111th East Avenue.

BOA-16740 July 1994: The Board of Adjustment denied a Special Exception to permit Use Unit 17 (Automotive and Allied Activities) in a CS zoned district and a Variance of the all-weather surface requirement for parking, finding the use to be inappropriate and inconsistent with the Board’s original requirement for a 150’ buffer area, due to the proximity to the residential neighborhood, on property located at 10922 East 2nd Street.

BOA-15275 November 1989: The Board of Adjustment approved a Special Exception to permit automobile sales, service and accessory body shop in a CS zoned district, subject to all automobile repairs being conducted inside the building and no outside storage of parts or inoperable automobiles, on property located at 40 South Garnett.

BOA-13053 March 1984: The Board of Adjustment approved a Variance to permit Use Unit 1225 (automotive painting) to permit antique automobile restoration in a CS District under the provisions of Section 1670, with the conditions that there be no outside storage of vehicles, that it be for this owner only, and that the painting not become the principal use of the property, on property located south of the southwest corner of admiral and South 111th East Avenue.

BOA-12945 January 1984: The Board of Adjustment approved a Special Exception to permit a four-bay car wash in a CS District under the provisions of Section 1680, limited to the northwest 102’ by 80’ of the lot per pictures and plans submitted, with the structure being brick with a
mansard roof and with the color of the brick matching as closely as possible the color of the brick used in the shopping center, on property located at west of the southwest corner of Admiral Place and 111th East Avenue.

**BOA-12848 November 1983**: The Board of Adjustment **denied** a *Special Exception* to permit restoring antique cars in a CS zoned District under the provisions of Section 1680, on property located south of the southwest corner of South 109th East Place and Admiral Place. Since the motion did not have three affirmative votes, Mr. Chappelle made a motion to APPROVE the application. The motion died for lack of a second, so the application was DENIED.

Case Number: Z-7527
Hearing Date: January 22, 2020
DEVELOPMENT CONCEPT: The applicant has submitted a request to rezone the subject property to CS for commercial development consistent. DETAILED STAFF RECOMMENDATION:

As the subject area is located in southwest Tulsa, it falls within the bounds of the Southwest Tulsa Neighborhood Plan. That plan was adopted in May of 2009. This small area plan was created to assist and progress the revitalization of this area, presenting a vision, needs, and goals for the area.

With these goals, the small area plan attempts to improve existing housing stock, revitalize underdeveloped areas, and increase accessibility to amenities, goods, and services through the implementation of sidewalks and business practices to attract retail and grocery stores to the area. It should be noted that while this plan presents a vision, needs, and goals for the southwest Tulsa area, the plan does not make any clear or specific land use recommendations to aid in achieving these goals, nor this particular area particular area in which the subject property is located. Instead, it focuses on presenting proposed capital improvement projects along Route 66, Southwest Boulevard, OSU campus, as well as the Cherry creek and Mooser creek trail system.

As the small area plan lacks any specific land-use recommendations, the 2010 Tulsa Comprehensive Plan solely provides guidance regarding land use for this area and,

The uses allowed in a CS district are consistent with the Tulsa Comprehensive plan Neighborhood Center land use designation therefore,

Staff recommends approval of Z-7527 to rezone property from RS-3, OL to CS.

SECTION II: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary: This site is on the north and east edges of the Neighborhood Center land use designation and abuts and existing neighborhood on the north and east edges.

Land Use Vision:

Land Use Plan map designation: Neighborhood Center
Neighborhood Centers are small-scale, one to three story mixed-use areas intended to serve nearby neighborhoods with retail, dining, and services. They can include apartments, condominiums, and
townhouses, with small lot single family homes at the edges. These are pedestrian-oriented places served by transit, and visitors who drive can park once and walk to number of destinations.

**Areas of Stability and Growth designation: Area of Growth**

The purpose of Areas of Growth is to direct the allocation of resources and channel growth to where it will be beneficial and can best improve access to jobs, housing, and services with fewer and shorter auto trips. Areas of Growth are parts of the city where general agreement exists that development or redevelopment is beneficial. As steps are taken to plan for, and, in some cases, develop or redevelop these areas, ensuring that existing residents will not be displaced is a high priority. A major goal is to increase economic activity in the area to benefit existing residents and businesses, and where necessary, provide the stimulus to redevelop.

Areas of Growth are found throughout Tulsa. These areas have many different characteristics but some of the more common traits are in close proximity to or abutting an arterial street, major employment and industrial areas, or areas of the city with an abundance of vacant land. Also, several of the Areas of Growth are in or near downtown. Areas of Growth provide Tulsa with the opportunity to focus growth in a way that benefits the City as a whole. Development in these areas will provide housing choice and excellent access to efficient forms of transportation including walking, biking, transit, and the automobile.

**Transportation Vision:**

**Major Street and Highway Plan:** West 61st Street South is a secondary arterial. No additional considerations have been assigned to this street.

**Trail System Master Plan Considerations:** None

**Small Area Plan:** Southwest Tulsa Neighborhood Plan was approved by resolution 2546:896 on May 14th 2009 prior to the format provided in Planitulsa which was adopted in 2010. The plan was an implementation plan that focused on public infrastructure and did not contemplate specific land use goals or land use recommendations for this location.

**Special District Considerations:** None

**Historic Preservation Overlay:** None

**DESCRIPTION OF EXISTING CONDITIONS:**

**Staff Summary:** The property is vacant and adjacent to commercial property on the west, a bar and single family residential on the east and north. The site is generally flat with little vegetation.

DETAILED STAFF RECOMMENDATION:
Z-7528 requesting RS-5 zoning is consistent with the Existing Neighborhood land use designation in the Tulsa Comprehensive Plan and,

RS-5 zoning is consistent with the original lot pattern in the area and,

Building types allowed in RS-5 zoning include detached homes, cottage homes, townhomes, and duplex buildings. The buildings in this area are eclectic and do not have a distinctive architectural style. The Unity Heritage/Greenwood Neighborhoods Plan encourages density and a mix of quality residential options in this area therefore,

Staff recommends Approval of Z-7528 to rezone property from RS-4 to RS-5.

SECTION II: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary: RS-5 zoning allows building types that are consistent with the expected development in this area and lot sizes that are consistent with the existing lot pattern.

Land Use Vision:

Land Use Plan map designation: Existing Neighborhood

The Existing Neighborhood category is intended to preserve and enhance Tulsa's existing single-family neighborhoods. Development activities in these areas should be limited to the rehabilitation, improvement or replacement of existing homes, and small-scale infill projects, as permitted through clear and objective setback, height, and other development standards of the zoning code. In cooperation with the existing community, the city should make improvements to sidewalks, bicycle routes, and transit so residents can better access parks, schools, churches, and other civic amenities.
**Areas of Stability and Growth designation: Area of Stability**

The Areas of Stability includes approximately 75% of the city’s total parcels. Existing residential neighborhoods, where change is expected to be minimal, make up a large proportion of the Areas of Stability. The ideal for the Areas of Stability is to identify and maintain the valued character of an area while accommodating the rehabilitation, improvement or replacement of existing homes, and small-scale infill projects. The concept of stability and growth is specifically designed to enhance the unique qualities of older neighborhoods that are looking for new ways to preserve their character and quality of life.

**Transportation Vision:**

**Major Street and Highway Plan:** None

**Trail System Master Plan Considerations:** None

**Small Area Plan:** Unity Heritage/Greenwood Neighborhoods Plan was effective in April 2014. The executive summary, which was the basis of this staff report, is labeled as the Greenwood Heritage Neighborhood Plan.

The relevant goals of the sector plan for residential use are:

1) **Enhance the desirability of all neighborhoods in the planning area:** While the conditions throughout the area vary greatly, all citizens should be provided with a common baseline standard for housing and infrastructure.

2) **Preserve and stabilize the areas healthy neighborhoods:** Many neighborhoods in the Greenwood Heritage area include well maintained housing, attractive streets, and on-going investment. It is critical that these areas maintain their momentum and continue to capitalize on the central location and unique character that define North Tulsa.

3) **Transform and revitalize neighborhoods most impacted by vacancy or poor maintenance**

**Special District Considerations:** Healthy Neighborhood Overlay

This site is included in the Healthy Neighborhood Overlay. The overlay requires spacing for small box discount stores and does not affect residential development decisions.

**Historic Preservation Overlay:** None

**DESCRIPTION OF EXISTING CONDITIONS:**

**Staff Summary:** The lot is empty and does not meet the minimum lot width or lot area standards for RS-4 properties.

SECTION III: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

**Staff Summary:** The employment land use designation anticipated light industrial uses. The anticipated redevelopment is consistent with the general concept of employment land use vision. The zoning and its optional development plan provided are consistent with the expected land use designation. In this instance the applicant did not provide any additional standards for current supplemental regulations therefore all current zoning code requirements will be used during site redevelopment.

**Land Use Vision:**

**Land Use Plan map designation:** Employment

Employment areas contain office, warehousing, light manufacturing and high tech uses such as clean manufacturing or information technology. Sometimes big-box retail or warehouse retail clubs are found in these areas. These areas are distinguished from mixed-use centers in that they have few residences and typically have more extensive commercial activity.

Employment areas require access to major arterials or interstates. Those areas, with manufacturing and warehousing uses must be able to accommodate extensive truck traffic, and rail in some instances. Due to the special transportation requirements of these districts, attention to design, screening and open space buffering is necessary when employment districts are near other districts that include moderate residential use.

**Areas of Stability and Growth designation:** Area of Growth

The purpose of Areas of Growth is to direct the allocation of resources and channel growth to where it will be beneficial and can best improve access to jobs, housing, and services with fewer and shorter auto trips. Areas of Growth are parts of the city where general agreement exists that development or redevelopment is beneficial. As steps are taken to plan for, and, in some cases, develop or redevelop these areas, ensuring that existing residents will not be displaced is a high priority. A major goal is to increase economic activity in the area to benefit existing residents and businesses, and where necessary, provide the stimulus to redevelop.

Areas of Growth are found throughout Tulsa. These areas have many different characteristics but some of the more common traits are close proximity to or abutting an arterial street, major employment and industrial areas, or areas of the city with an abundance of vacant land. Also, several of the Areas of Growth are in or near downtown. Areas of Growth provide Tulsa with the opportunity to focus growth in a way that benefits the City as a whole. Development in these areas will provide housing choice and excellent access to efficient forms of transportation including walking, biking, transit, and the automobile."
