REPORTS:

Chairman's Report:

Mr. Covey stated Roy Johnsen a longtime attorney here in Tulsa, who appeared before this Commission, throughout his career died on January 2, 2021. He stated Roy was a great legal scholar and his life's work was representing clients in real estate matters. Mr. Covey stated he was a nice man and the first gentlemen who ever came up and welcomed him to the Commission and he will never forget that. He stated he would like to extend our sympathies to his friends and family.

Director's Report:

Ms. Miller stated the amendment to the Open Meetings Act is currently going through the legislature and is expected to be signed by the governor in the next few days. She stated hopefully by the next Planning Commission meeting Commissioners will have the option to participate virtually again. The current version is tied to the emergency declaration that the governor has signed. Ms. Miller stated 30 public meetings are scheduled between January and the middle of February on a lot of different initiatives including Missing Middle Housing. She stated staff has met with specific neighborhoods near downtown and presented the idea in case they want to apply for their neighborhood. Ms. Miller reported on City Council and Board of County Commissioner actions and other special projects.

- 7. **Z-7597 Lou Reynolds** (CD 7) Location: East of the southeast corner of East 91st Street South and South 97th East Avenue requesting rezoning from CO to CS

STAFF RECOMMENDATION:
SECTION I: Z-7597

DEVELOPMENT CONCEPT: The Original CO zoning was established in 1988 without a development plan. Current zoning code requirements include an ordinance for a new development plan. CO zoning concepts for internal street collection systems are no longer relevant with this site and CS zoning seems more appropriate.

DETAILED STAFF RECOMMENDATION:

Z-7597 requesting CS is consistent with the Regional Center land use designation of the Tulsa comprehensive plan and,

CS zoning is non-injurious to the surrounding property owners.

Uses and supplemental regulations allowed in a CS zoning district are consistent with the expected development pattern in the area therefore,

Staff recommends Approval of Z-7597 to rezone property from CO to CS.

SECTION II: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary: The uses and supplemental regulations allowed in a CS district are consistent with the expected development concepts in a Regional Center and an Area of Growth.

Land Use Vision:

Land Use Plan map designation: Regional Center

Regional Centers are mid-rise mixed-use areas for large-scale employment, retail, and civic or educational uses. These areas attract workers and visitors from around the region and are key transit hubs; station areas can include housing, retail, entertainment, and other amenities. Automobile parking is provided on-street and in shared lots. Most Regional Centers include a parking management district.

Areas of Stability and Growth designation: Area of Growth

The purpose of Areas of Growth is to direct the allocation of resources and channel growth to where it will be beneficial and can best improve access to jobs, housing, and services with fewer and shorter auto trips. Areas of Growth are parts of the city where general agreement exists that development or redevelopment is beneficial. As steps are taken to plan for, and, in some cases, develop or redevelop these areas, ensuring that existing residents will not be displaced is a high priority. A major goal is to increase economic activity in the area to benefit existing residents and businesses, and where necessary, provide the stimulus to redevelop.

Areas of Growth are found throughout Tulsa. These areas have many different characteristics but some of the more common traits are in close proximity to or abutting an arterial street, major employment and industrial areas, or areas of the city with an abundance of vacant land. Also, several of the Areas of Growth are in or near downtown. Areas of Growth provide Tulsa with the opportunity to focus growth in a way that benefits the City as a whole. Development in these areas will provide housing choice and excellent access to efficient forms of transportation including walking, biking, transit, and the automobile.”

Transportation Vision:

Major Street and Highway Plan: Multi Modal Street

Multi-modal streets emphasize plenty of travel choices such as pedestrian, bicycle and transit use. Multimodal streets are in high intensity mixed-use commercial, retail and residential areas with substantial pedestrian activity. These streets are attractive for pedestrians and bicyclists because of landscaped medians and tree lawns. Multi-modal streets can have on-street parking and wide sidewalks depending on the type and intensity of adjacent commercial land uses. Transit dedicated lanes, bicycle lanes, landscaping and sidewalk width are higher priorities than the number of travel lanes on this type of street. To complete the street, frontages are required that address the street and provide comfortable and safe refuge for pedestrians while accommodating vehicles with efficient circulation and consolidated-shared parking.

Streets on the Transportation Vision that indicate a transit improvement should use the multi-modal street cross sections and priority elements during roadway planning and design.

Trail System Master Plan Considerations: None

Small Area Plan: None

Special District Considerations: None

Historic Preservation Overlay: None

DESCRIPTION OF EXISTING CONDITIONS:

Staff Summary: Single family home on a wooded site.
