In granting the Variance, the Board finds that the following facts, favorable to the property owner, have been established: that the physical surroundings, shape, or topographical conditions of the subject property would result in unnecessary hardships or practical difficulties for the property owner, as distinguished from a mere inconvenience, if the strict letter of the regulations were carried out; that literal enforcement of the subject zoning code provision is not necessary to achieve the provision's intended purpose; that the conditions leading to the need of the requested variance are unique to the subject property and not applicable, generally, to other property within the same zoning classification; that the alleged practical difficulty or unnecessary hardship was not created or self-imposed by the current property owner; That the variance to be granted is the minimum variance that will afford relief; That the variance to be granted will not alter the essential character of the neighborhood in which the subject property is located, nor substantially or permanently impair use or development of adjacent property; and that the variance to be granted will not cause substantial detriment to the public good or impair the purposes, spirit, and intent of the zoning code or the comprehensive plan.
