

Route 66 BRT Stop Types

Legend
 — Route 66 BRT Alignment

- Stop Type**
- Enhanced Full Station
 - Full Station
 - Constrained
 - Future

About this map:
 This map depicts the Route 66 BRT stops grouped into four types based on funding constraints. An Enhanced Full Station is planned for Eastgate Metroplex. Full Stations are stops with the full suite of stop amenities. Constrained Stations are stops with smaller footprints and limited amenities. Future Stations are locations where either Full or Constrained Stations will be built in the future when funding becomes available.
